# HOW TO INSTALL LIGHTROOM PRESETS IN LIGHTROOM MOBILE (DNG FILES)
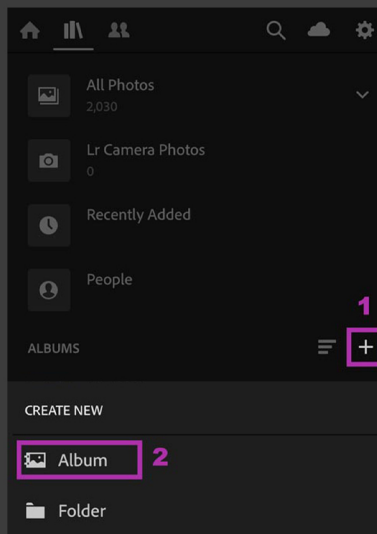

1. Download our ZIP Folder , and extract it to a folder.

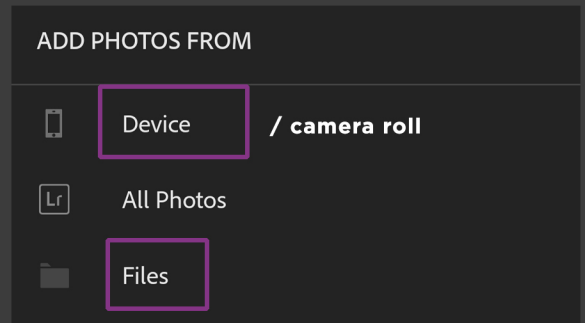

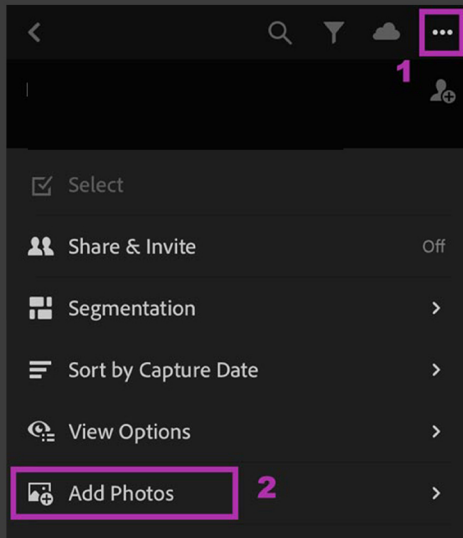

2. Transfer the files inside the folder into your phone. (DNG files). Make sure to extract the zip.

[If you are having difficulty because you are using an iphone, you could do the file transfer via Dropbox, Airdrop, or Google Drive]

3. Open the Lightroom App in your mobile.

**4. Create a new album, you may name it as the name of our presets.**

5. Open the new album, tap on the 3 dots in the upper right corner and then tap on Add Photos

Choose either from Device (writen as Camera Roll in IOS) or Files

6. Select the DNG files that you transferred into your phone just now, and import them into the newly created album in Lightroom

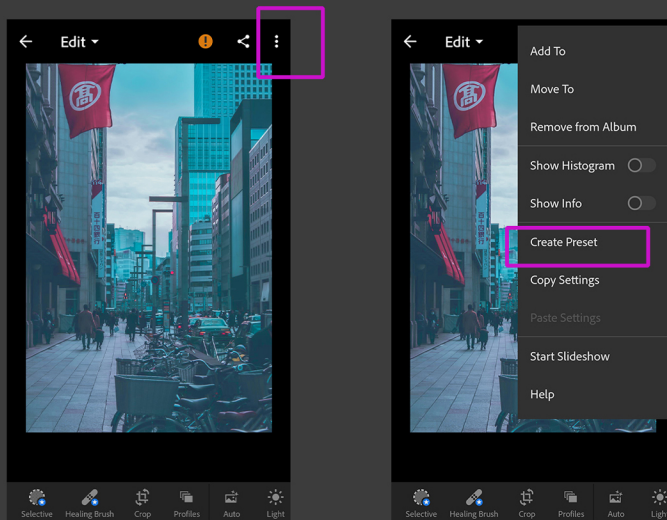

Sometimes it's marked as [**RAW**], sometimes as [**DNG**], depending on your phone.

It's fine either way.

7. Go into the album containing your newly imported DNG files. Open the first file.

8. Now tap on the 3 dots icon at the top right of the screen and then tap on *Create Preset*

9. You will see the *New Preset* scene (shown below), Give your preset a name, and add it into a preset group. Now, Check all boxes and save your preset by tapping on the checkmark icon at the top right corner.

That's it !

You're done with installing a preset. Just repeat the same process for the remaning presets.

If you have more difficulties and questions, don't hesitate to message us on Etsy ! :)
