# GUIDE

1. Extract File

Locate your **Download** on your machine and **Extract** its contents
Do so on a Mac by **Double-Clicking**
Do so on Windows machine by **Right-Clicking** and hitting **Extract All**

2. Install the Action

Step 1.

Launch Photoshop and open the **Action Panel**
with **Window > Actions (Alt+F9)**
Look to the top right of the Actions Panel for the flyout panel menu.
Select Load Actions.

Step 2.

Navigate to the .atn File that was **Extracted**
from the **Downloaded Zip File,** Then press the **Load Button**

Step 3.

Verify the Action loaded by looking at the bottom of the list of actions
in the **Actions Panel.** The new Action Should have been appended to
the end of the list.

3. Install the Pattern

Step 1.

Click Edit > Presets > Preset Manager...

Step 2.

Navigate to the **.pat** File that was **extracted**
from the **Downloaded Zip File,** then press **Load Button.**

4. Use the Action

After install the action, it's wise to test it to make sure it
works properly and to see what does !

Step 1.

open the image you want to create
Ctrl+O (file > Open... > Double click the Image)
**Change the resolution between 150-300 PPI**
If you want more detailed result

Step 2.

Create a **new layer** and change it to **"brush"**

Step 3.

Paint the image on layer **"brush"** then **Click Play Action.**

Awesome Work, You're Done !
Enjoy It
