

## Photoshop Action - how to use?

### Basic settings and recommendations:

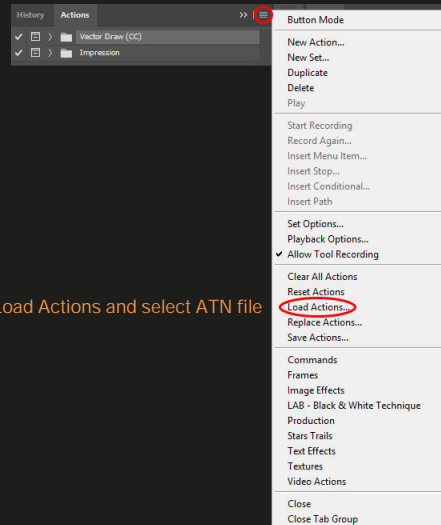

1. Use the RGB mode and 8-Bits color
2. Use English version of Photoshop
3. Be sure the photo set Background from layer (Go to Layer/New/Background from layer)
4. Set to opacity **Brush and Flow to 100%**
5. Best use photo size between 2000-3000px

### How to install Actions:

1. Click **Alt+F9** to open action panel

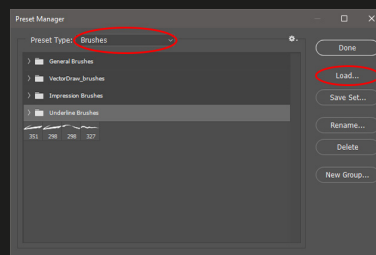

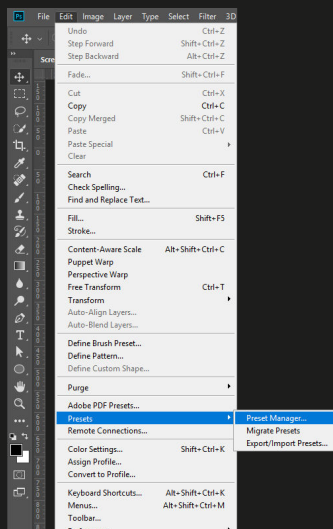

press this icon for open Action menu

click Load Actions and select ATN file

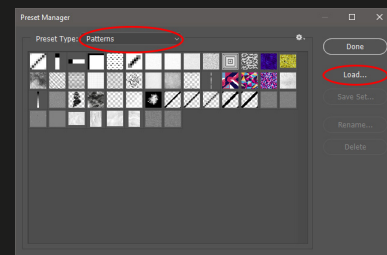

### How to install Brush and Pattern:

1. Click **Edit/Presets/Preset Manager**

in Preset Type select **Brushes**  
then click **Load** and select brushes

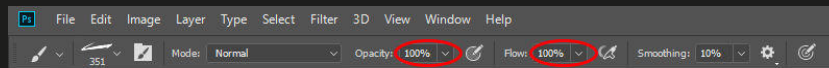

in Preset Type select **Patterns**  
then click **Load** and select pattern

or double click on ATN, ABR and PAT file...

How to play action:

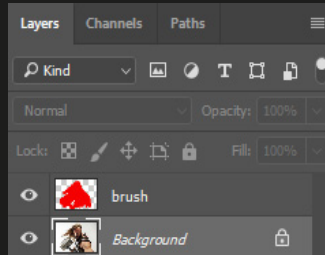

\*\*\* Brush tool **Opacity** and **Flow** must be set to 100% \*\*\*

\*\*\* Open photo (easy way simply drag & drop in photoshop) \*\*\*

be sure Background layer is locked (**Layer/New/Background from layer**)

create new layer named **brush** and isolate area of interest

\*\*\* Play Action \*\*\*

Oil Paint Filter is grayed out:  
[possible solution if you have this issue](#)

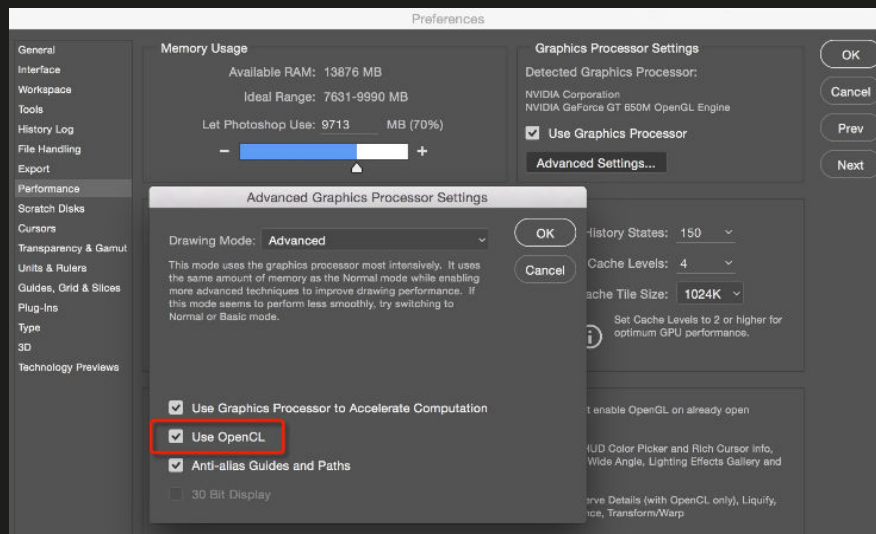

If Oil Paint is grayed out for you, try these steps:

[Make sure Photoshop is up-to-date](#)

[Make sure that your document is RGB. Oil Paint won't work on color spaces other than RGB \(e.g. CMYK, Lab, etc.\)](#)

[If you're on Windows, make sure you're running a 64-bit OS with the 64-bit version of Photoshop. OpenCL requires 64-bit](#)

[Make sure Use Graphics Processor is checked under Preferences > Performance](#)

[Make sure that your video card driver is up to date with the latest from the vendor website.](#)

**Note:** If your video card does not support OpenCL v1.1 or higher, you may need to purchase an upgraded video card that supports OpenCL v1.1 or higher to gain access to the Oil Paint filter.

[Information about your graphics card can be found in Photoshop's Help > System Info dialog.](#)
