# How to Edit Logo Templates

Thank you for downloading these resources. Your support means that I can continue to make creative elements and share them with fellow artists and designers. All vectors in my resource sets are fully scalable, meaning they will retain their crisp quality no matter how big or small you make them. This guide will help you get the most out of these logo templates. Happy creating!

VECTOR LOGOS are the best option for your business if you plan to use them anywhere other than online.. If you want your logo printed on stationary, posters or textiles, you will want to use these vectors rather than a .png. To change the text you will need Adobe Illustrator (.ai files) or Adobe Photoshop (.psd files). The .eps file works in both Illustrator and Photoshop. (Please note, editing text in Photoshop means that it will not be a vector and might not scale up to bigger sizes. I always recommend using Illustrator or equivalent vector software where possible.)

Select the Type Tool (the symbol with a T in your tool bar, or press the letter T on your keyboard if you have shortcuts turned on).

Hover your cursor over the placeholder text that I put in the logo. You should now be able to click into that text, select it, delete it, and type your own text.

You can also change the colours as you would any text or shape.

AMARYLIS WEDDING PLANNING

BRINGING YOUR DREAMS TO LIFE

To make a vector bigger or smaller and retain its dimensions, a handy tip is to hold down SHIFT while you drag one corner of the logo's bounding box. The vector should retain its proportions.

As always, if you have any problems or further questions about how to use my resources in your work, feel free to email me at ✉ *joliverdesigns@gmail.com.* I work full time so it might take a couple of days to reply, but I will reply.

Connect With Me

I love hearing from people who have downloaded my resources and used them in their own work. Show me your amazing creations. Tag me on social media - I will check out your post!
