# Adobe Photoshop Lightroom for Mobile Preset Instructions

Presets for Lightroom Mobile are installed through Lightroom on your desktop. Once installed, they will sync to your mobile device.

**Important:** You must have an active Creative Cloud subscription to sync presets. Otherwise, please follow the instructions on the next page.

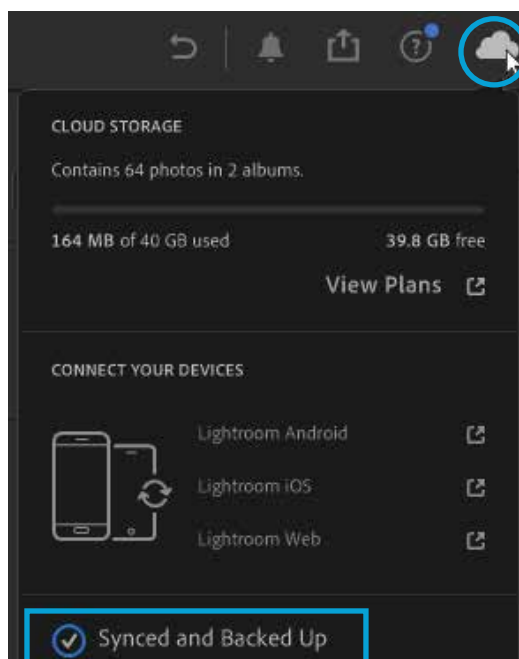

## Step 1

Open Lightroom on your desktop. Go to File > Import Profiles & Presets. Navigate to the product folder. Load all the XMP presets from **Desktop** folder,

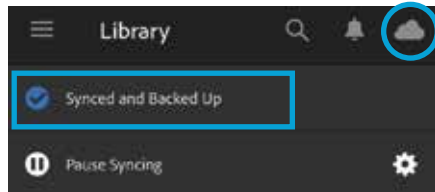

## Step 2

After loading the presets on your desktop, they should automatically sync to Lightroom Mobile on your mobile device. To check the sync status, click on the cloud button.

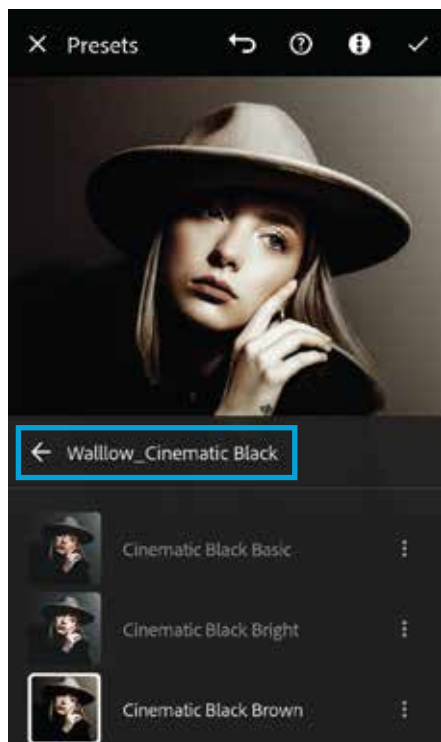

### Step 3

Open Lightroom Mobile on your mobile device. It may take a moment for the presets to sync. To check the sync status, tap on the cloud button

### Step 4

In Lightroom for Mobile, choose a photo to edit then tap the Presets button

### Step 5

Tap on the dropdown menu and select the imported preset. Tap on the preset to preview the look. When you're ready, tap the checkmark button on the top-right of the interface to apply the preset. Done.

# Adobe Photoshop Lightroom for Mobile

## DNG Preset Instructions

DNG presets allow you to copy the preset settings without a computer or an active Creative Cloud subscription. Follow these instructions only if you cannot use the native presets.

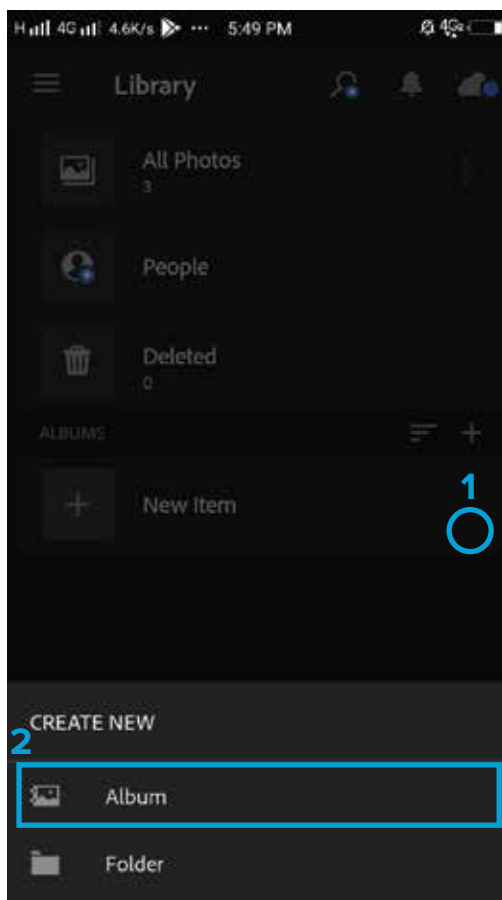

### Step 1

Download the product on your phone. Open the zip file and extract the **Mobile** folder.

If your device does not have a zip or file manager app, you can install one from the app store.

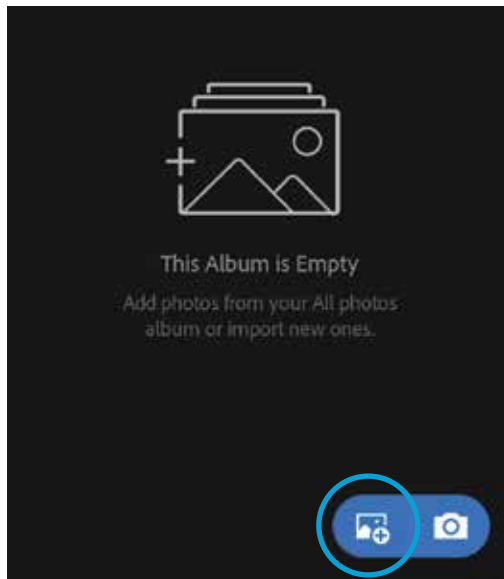

### Step 2

Open the Adobe Photoshop Lightroom app. Create a new album.

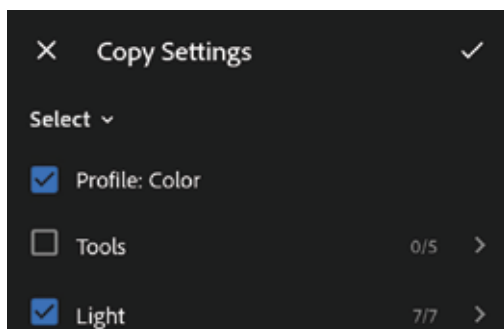

### Step 3

Tap the album then tap the Add Photos button. Sort it by time, select all the DNG presets, then click Add.

### Step 4

Select a preset. Tap the menu on the top-right then tap Copy Settings. Go to your photo and paste the settings. Done.

# Adobe Photoshop

## Preset Instructions

### Step 1

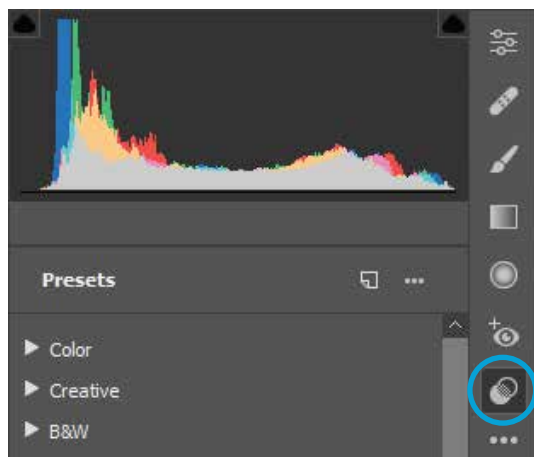

Following this step will allow you to apply the preset nondestructively - the settings can be changed at any time.

From the Layers panel, right-click on the layer then choose "Convert to Smart Object".

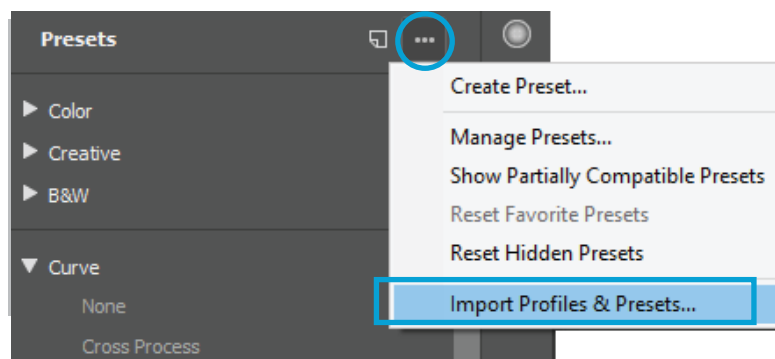

### Step 2

Go to Filter > Camera Raw Filter. In the Camera Raw window, go to the Presets panel

### Step 3

Click on the panel menu then choose "Import Profiles & Presets". Navigate to the product folder. Load all the XMP presets from **Desktop** folder,

### Step 4

From the Presets panel, expand the imported preset folder and select a preset. Done.

## Frequently Asked Questions

[Can I use these presets in Lightroom Classic, Lightroom CC, the Lightroom mobile app and Adobe Camera Raw \(ACR\)?](#)

Yes! You can use all of our Presets in Lightroom Classic, Lightroom CC, the Lightroom mobile app and Adobe Camera Raw. Our presets can also be used in the stand-alone version of Lightroom 5 and Lightroom 6

[Why are the presets for Adobe Photoshop Lightroom ".xmp" files instead of ".lrtemplate" files?](#)

Presets in the ".lrtemplate" file format are made with older versions of Lightroom. Beginning with the release of Adobe Lightroom Creative Cloud v1.3, Adobe Lightroom Classic Creative Cloud v7.3, and Adobe Camera Raw 10.3, the file format for presets has been changed to ".xmp".

[Do you have presets that will work in Lightroom 5, Lightroom 6, Lightroom Classic and the Creative Cloud?](#)

Yes, all of our presets work in Lightroom 5, Lightroom 6, Lightroom Classic, and Lightroom CC.

[Why aren't these presets showing up in my Lightroom? I followed your instructions.](#)

You want to be sure you are using version 7.5 of Lightroom or higher when using XMP file presets. If you are running an older version of lightroom, you can use the .lrtemplate file presets. Both are included in our preset pack. Presets work best with RAW images. If a preset is greyed out, make sure you are actually editing a RAW photo - not a JPEG or a Screenshot, etc.

## NEED HELP?

Your comments and suggestions are highly appreciated. If you still find any error please let us know.  
We will investigate and will help you.
