

Creative Painting Action

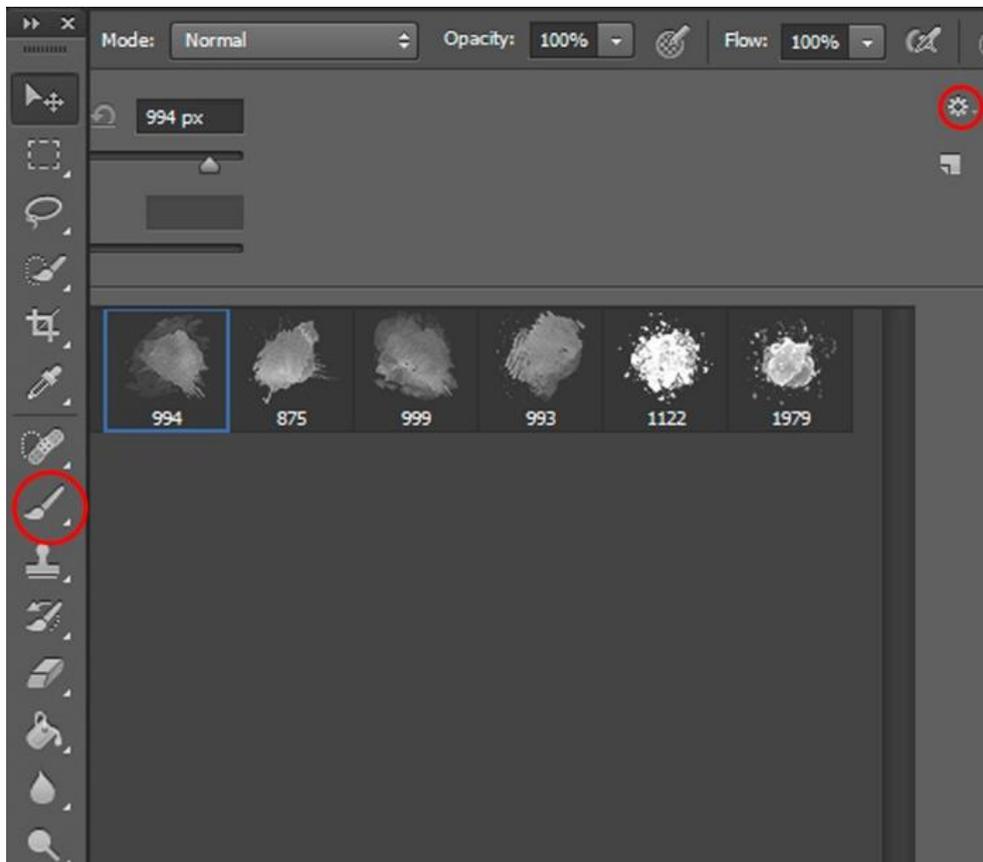

1) Install Action, Brushes and Patterns.

- Use alt+f9 combination to open actions panel (or go to window-actions)

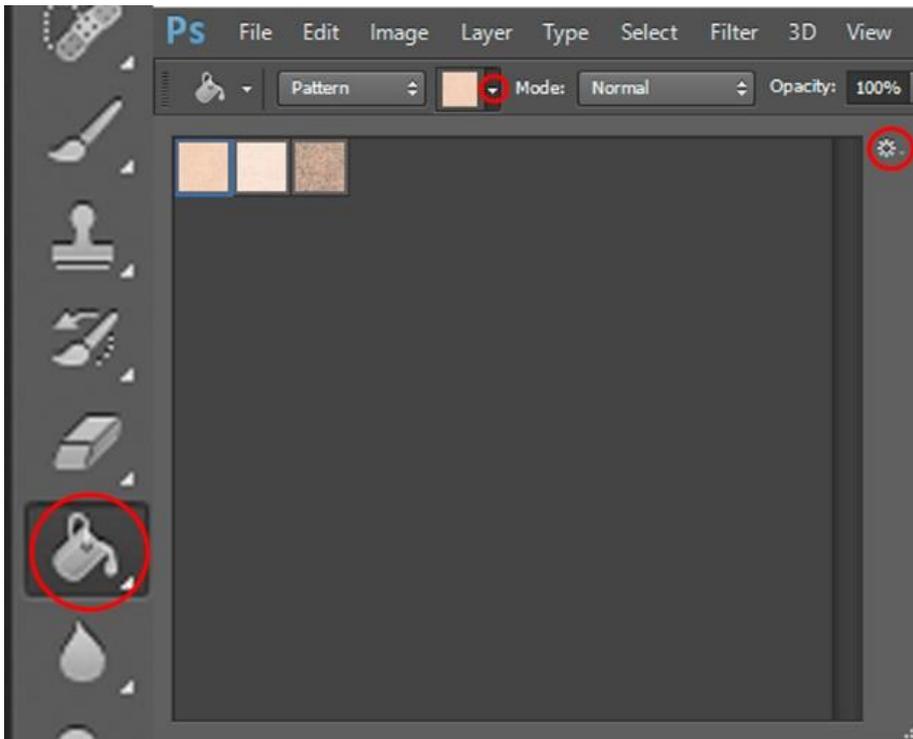

- Click on icon in top right corner – load actions

- Select brush tool and click on gear icon – load brushes

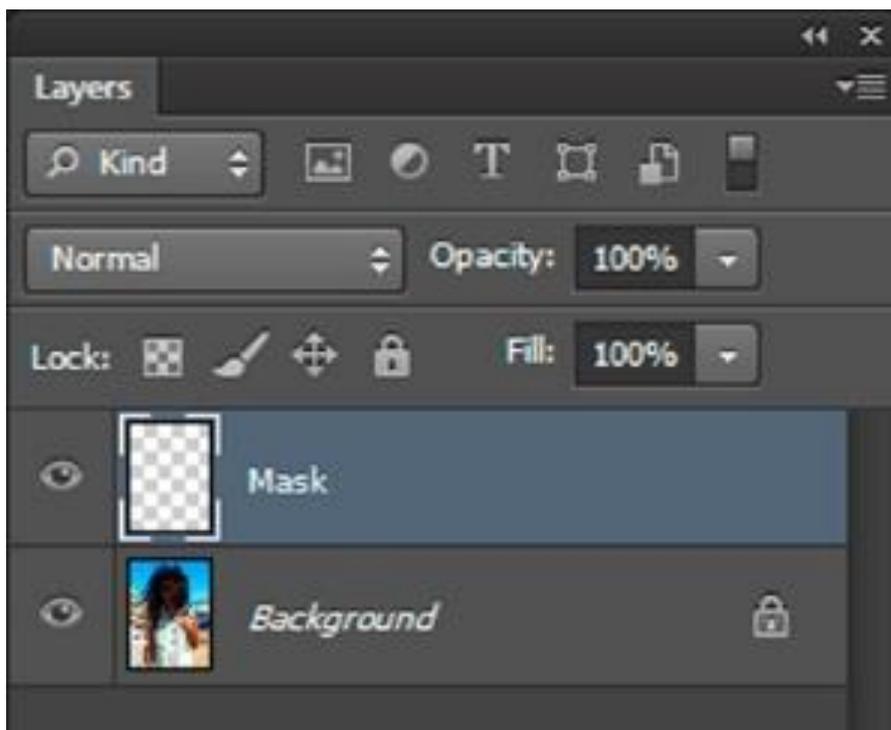

- Click on paint bucket tool and change mode to pattern, then click on gear icon – load patterns

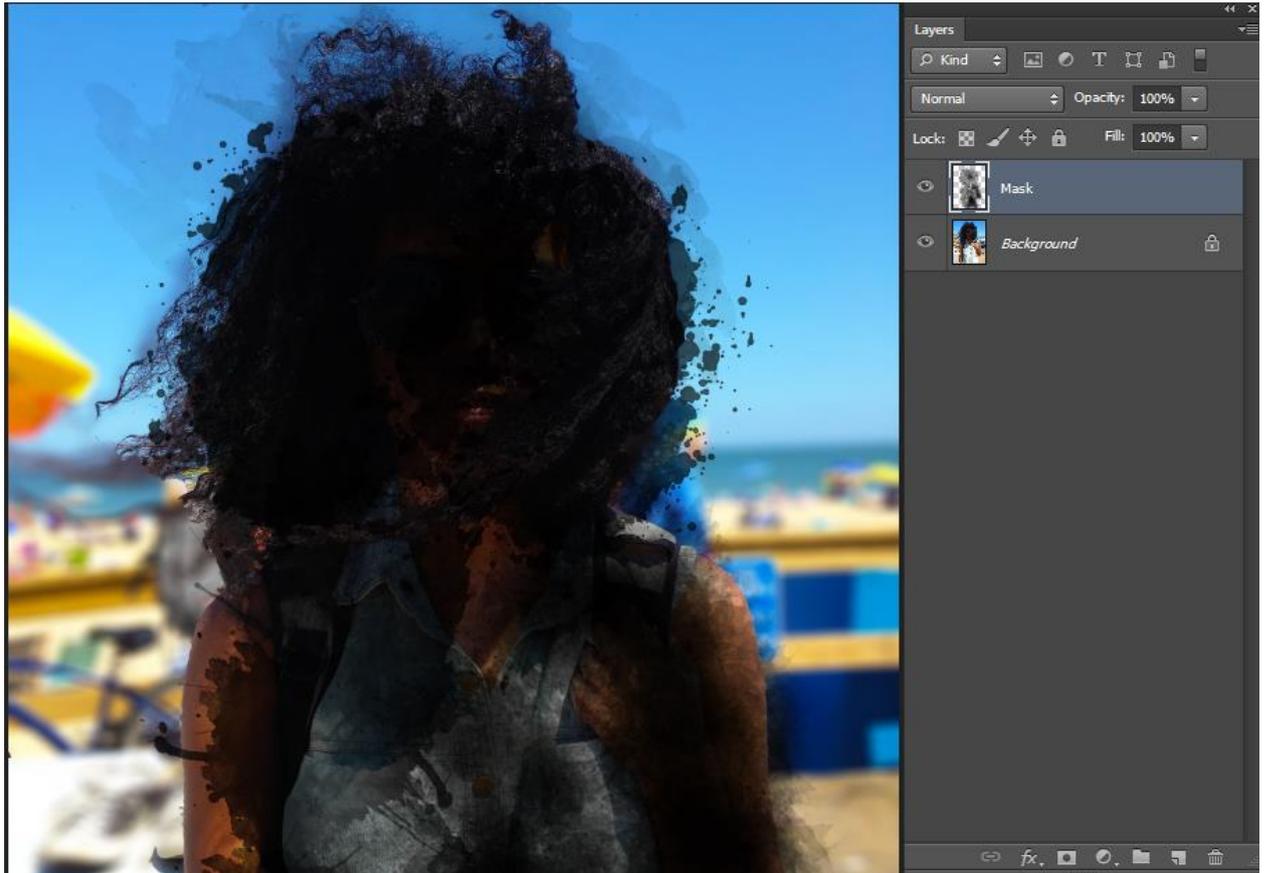

2) Using action.

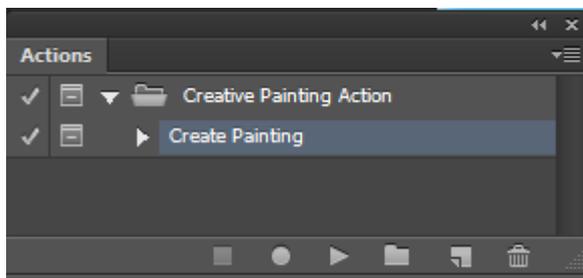

- Once you have done with installation of action, brushes and pattern we are ready to use our action
- Open your photo and make a new layer "Mask"

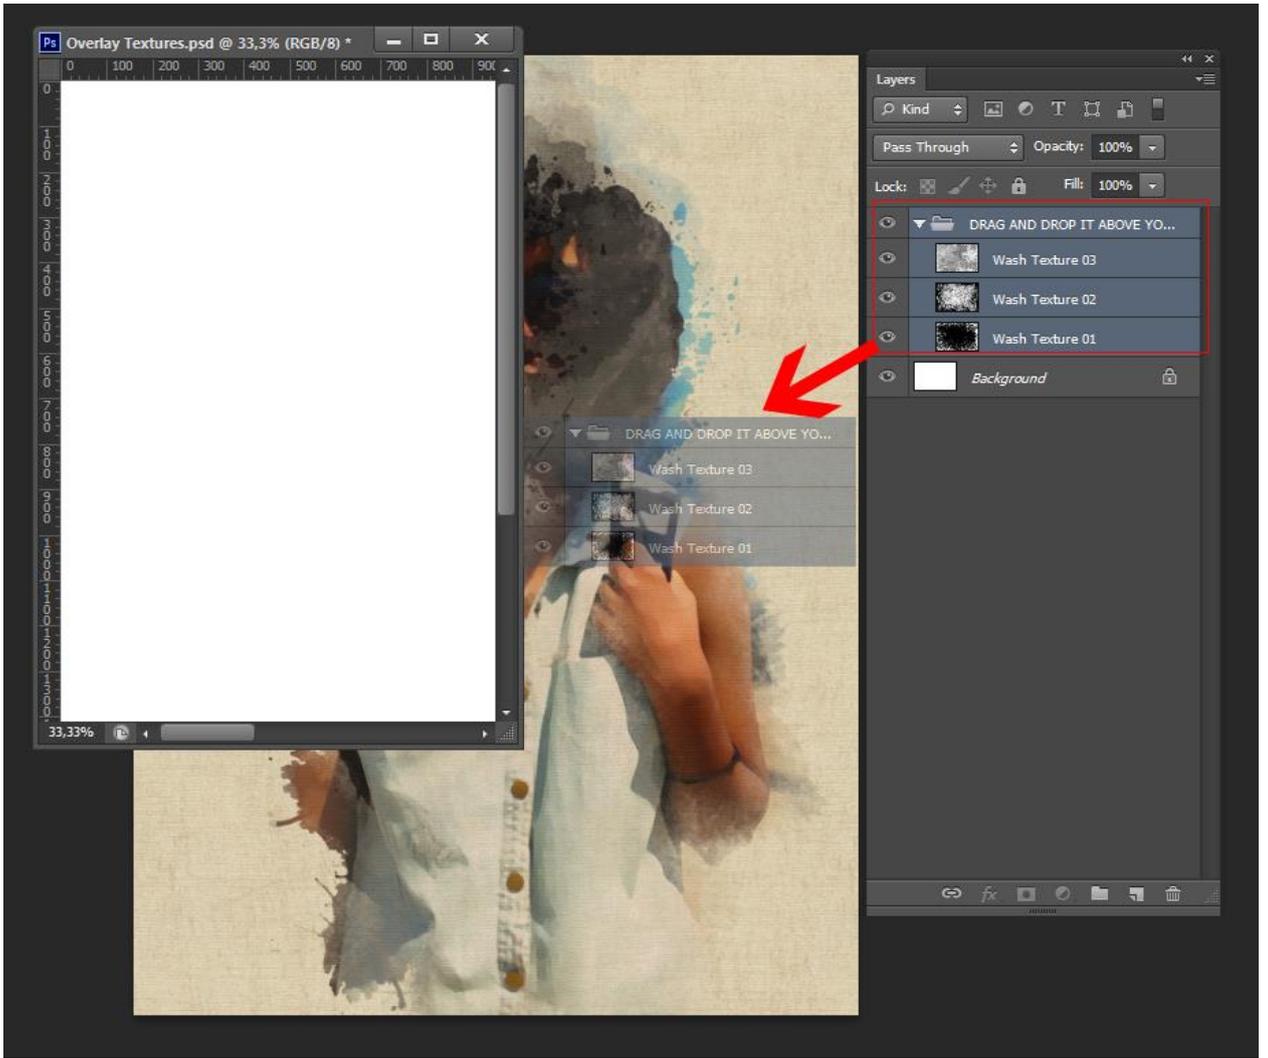

- brush a new mask with “Watercolor Brushes”

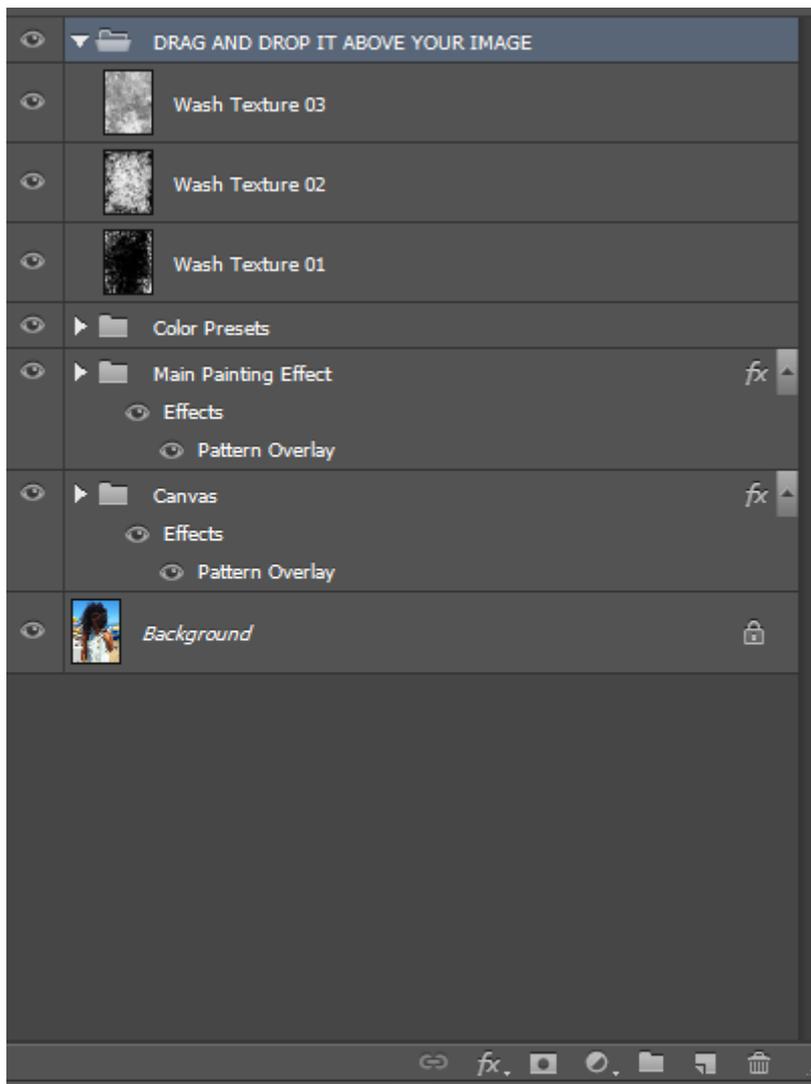

- Select action and click play.

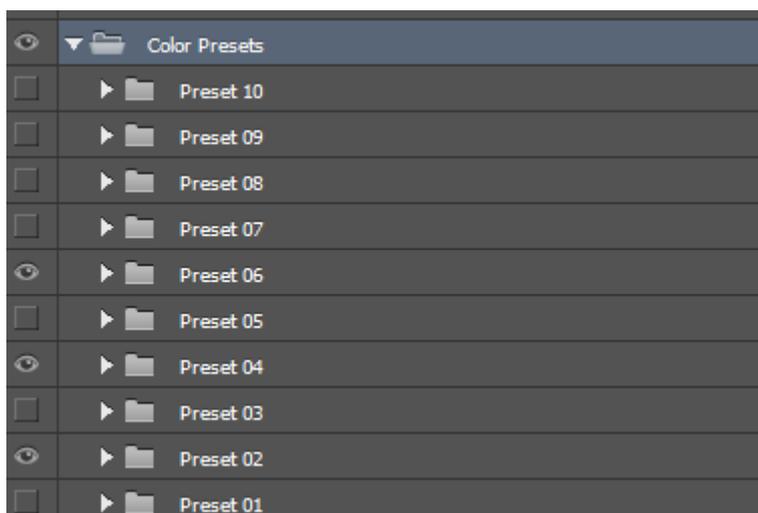

- When action is completed, you need to add textures. Open “Overlay textures.psd” from main download. Drag and drop textures above all layers in your document and resize it to border. (Use ctrl-t combination to transform your layer. Hold shift to save proportion of textures)

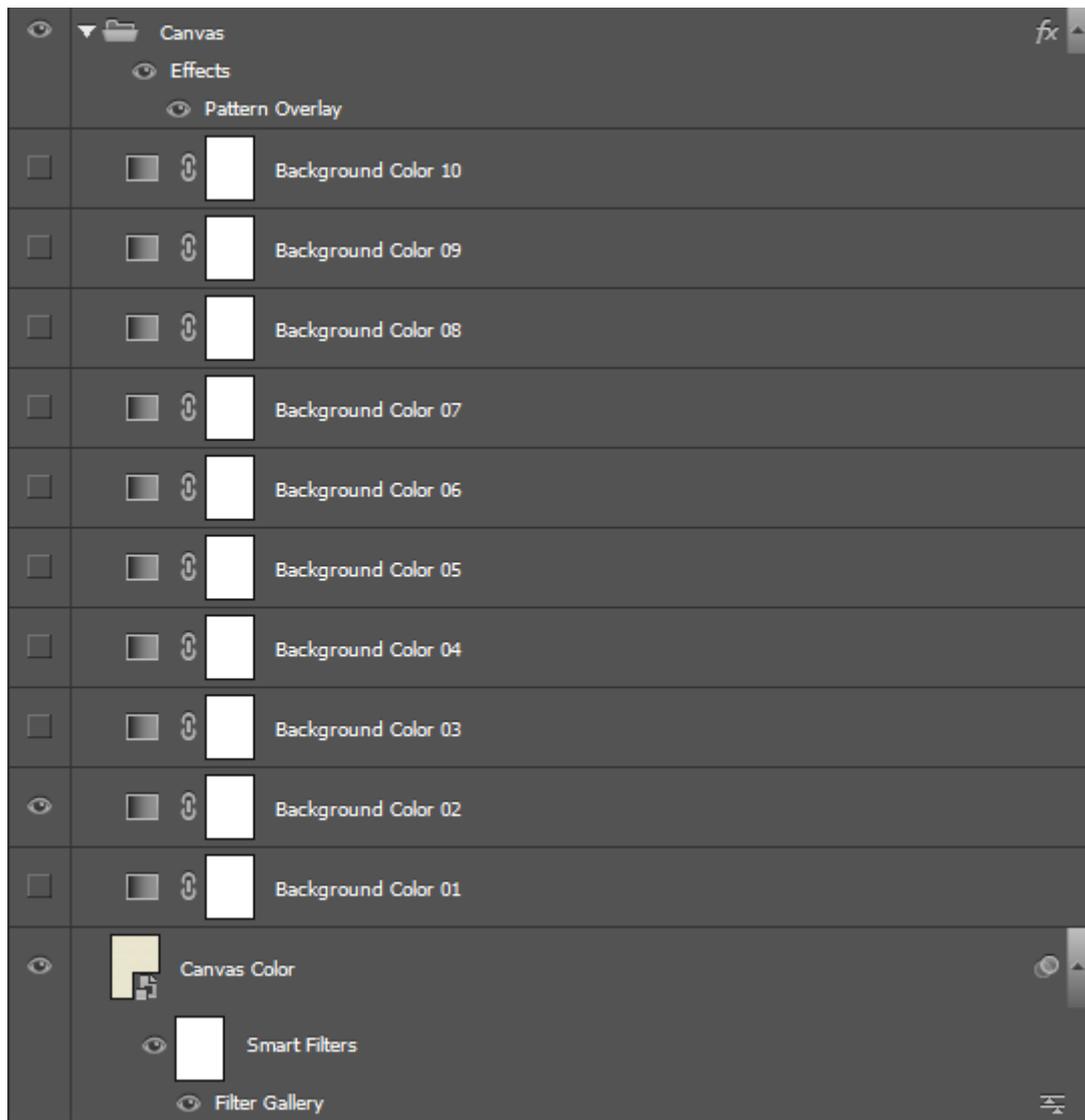

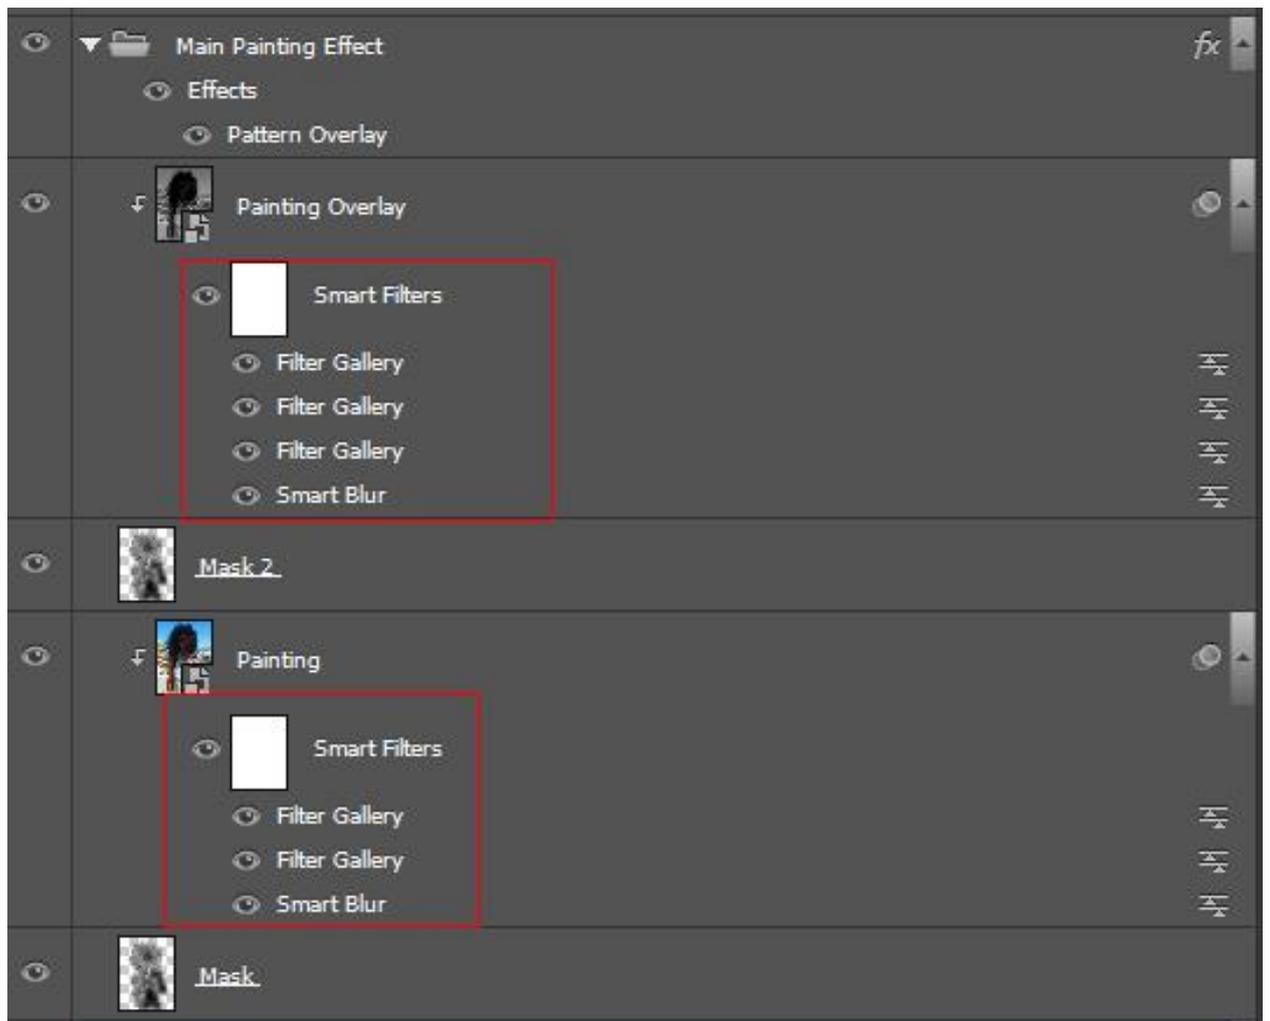

- **Select color presets by clicking on eye icon near special layers**

- **Change background colors the same way**

- **Combine effects to get unique look. Play with opacity and blending modes of textures, color presets and mask layer.**
- **All effect are editable you can change it by click on effect name under smart objects layers.**
