

HELP GUIDE

Installation Guide for Lightroom Mobile app (Android)

Please make sure you have the latest version of the app installed

- 01 / Unzip your download & You will see a folder name **"SummerLove Presets for Photoshop and android phone"**.
Input this folder into your mobile.
- 02 / Open the Lightroom application on your phone and select an image from your library and press to open it.
- 03 / Slide the toolbar to the bottom to the right and press the "Presets" tab. Press the three dots to open the menu and select "Import Presets".
- 04 / Your file explorer appears on the screen. Navigate to the folder **"SummerLove Presets for Photoshop and android phone"** file and import the presets.
- 05 / Your presets will now be imported and will be available under a group name **"User Presets"** in the "Presets" tab.
