

Hello

THANK YOU so much for buying my presets! May it help you be creative with your photos. Let's get you all ready and set up!

How to install Presets in Lightroom 4, 5, 6, and Lightroom CC

Macintosh

1. Download and unzip the presets file and open the resulting folder.
2. In this folder you will find the presets, they are the files with the .lrtemplate extension.
3. Open Lightroom
4. In top menu bar choose Lightroom>Preferences.
5. There will be a new window that appears. Select the Presets tab.
6. Click on the button labeled "Show Lightroom Presets Folder."
7. In this new Finder window open the 'Lightroom' folder, and then open the 'Develop Presets' folder.

Copy and Paste the presets folder into this location.

8. Restart Lightroom, the presets can be found in the Presets section on the left in the Develop module.

Windows

1. Download and unzip the presets file and open the resulting folder.
2. In this folder you will find the presets, they are the files with the .lrtemplate extension.
3. Open Lightroom
4. In the top menu bar choose Edit>Preferences
5. There will be a new window that appears. Select the Presets tab.
6. Click on the button labeled "Show Lightroom Presets Folder."
7. In the new Explorer window that appears open the 'Lightroom' folder, and then open the 'Develop Presets' folder.

Copy and Paste the presets folder into this location.

8. Restart Lightroom, the presets can be found in the Presets section on the left in the Develop module.
