THANK YOU  
FOR YOUR PURCHASE

HOW TO INSTALL PRESETS ON  
LIGHTROOM MOBILE STEP BY STEP

If you have any problems, please contact me, I will  
happy to help you

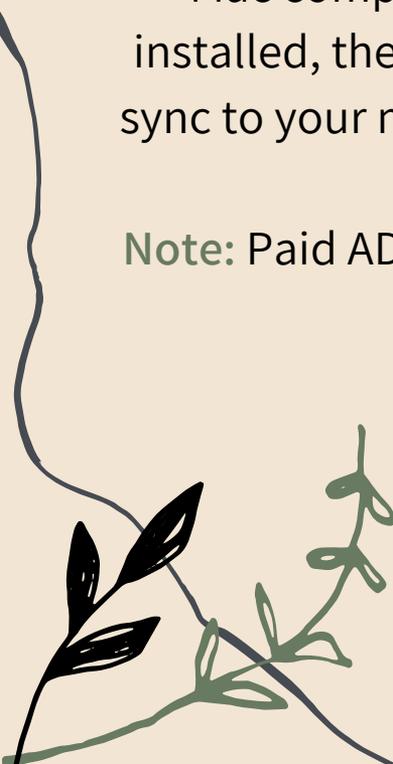

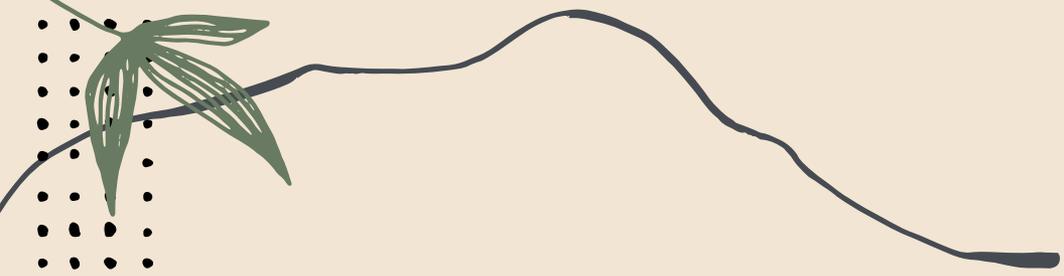

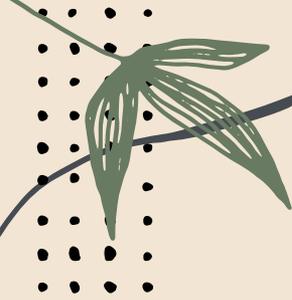

## METHOD 1: VIA LIGHTROOM ON DESKTOP (USING XMP PRESETS)

You must install the presets in the Lightroom desktop application (not Lightroom Classic) on your Windows or Mac computer first. Once they are installed, the presets will automatically sync to your mobile device via the cloud.

**Note:** Paid ADOBE CLOUD SUBSCRIPTION  
Required

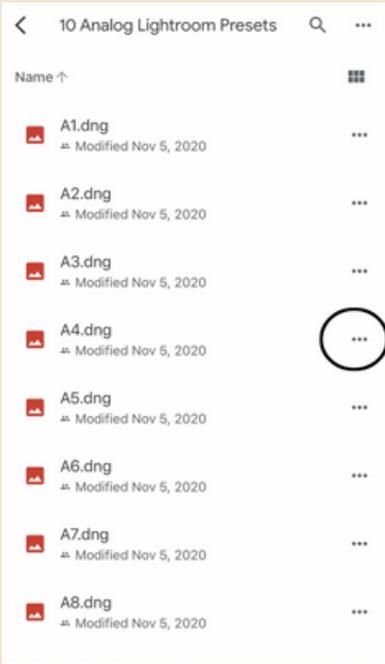

## METHOD 2: VIA LIGHTROOM MOBILE APP

1, Once your payment confirmed, you are able to download 1 file for Desktop and 2 for Mobile.

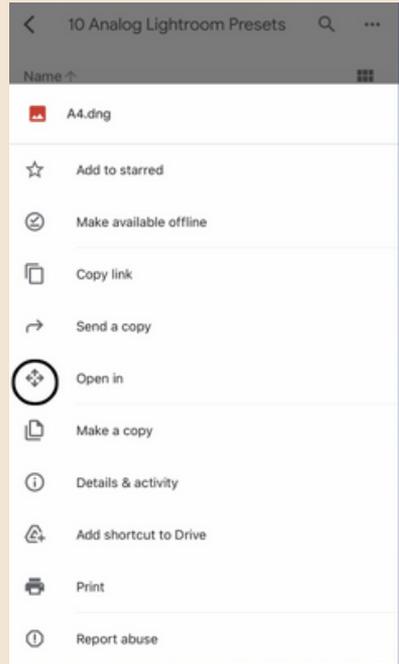

2, From "**For Mobile**", you will get Drive link to download DNG files (use for Lightroom Mobile), you can save all of these images to your Camera Roll or directly import all the photo into Lightroom Mobile.

PHOTO GUIDE BELOW

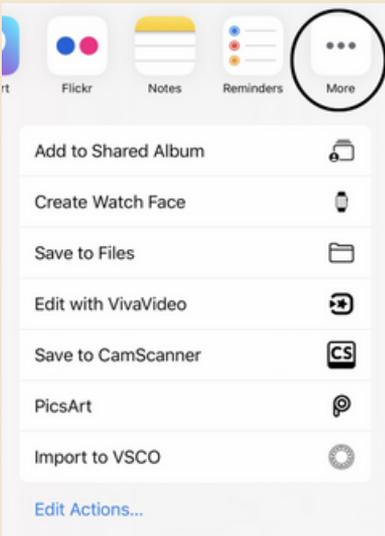

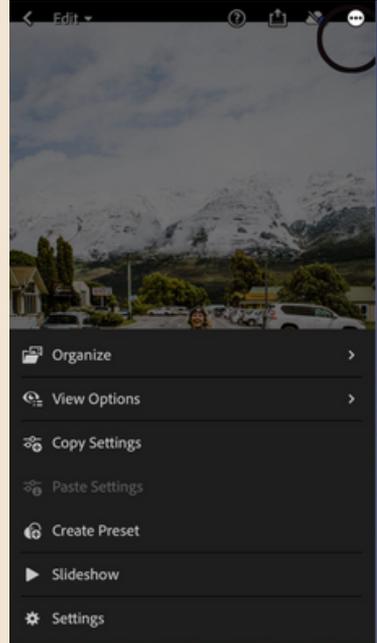

Open the link you can  
see DNG files  
Then click "..."

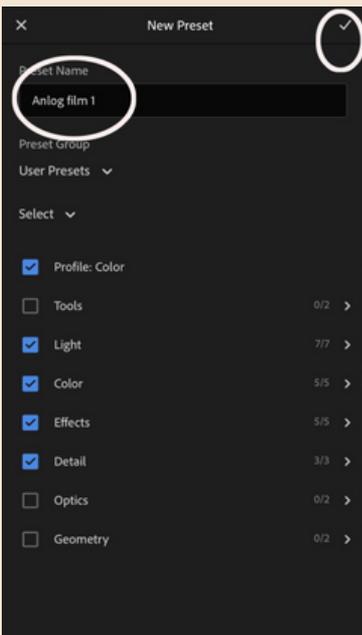

Click "Open in"

Click "More" on the top right  
Then find and choose  
"Lightroom" app

Open in Lightroom. The file will be saved on your Lightroom. Now you open Lightroom and open the picture that was saved. Click "... " then "Create Presets"

You can rename the presets and save it. Now, check it out in the presets section and start adding presets to your photos.

Do it again with the next DNG photo for another preset.
