

How to Install LUTs – Photoshop

1. Unzip The LUTs

In order to add the LUT to your project, you need to unzip it. This is pretty straight forward and you can either use a specialised software or the Windows built-in unzipping tool.

2. Open Your Project

When talking about Photoshop, the project is usually an image, so go ahead and open that. Either by clicking on 'Ctrl+O' to open a new one, or import something from your cloud.

3. Create A New Color Look-Up Adjustment Layer

You can do this by clicking the 'Color Lookup' button in the 'Adjustments' tab.

4. Open Your LUT

Click on the 'Load 3D LUT' button, and then point Photoshop to the location you unzipped the LUT files to.

How to Install LUTs – Adobe Premiere Pro

**Note: Premiere has specific locations where they require you to store the LUT files so you'll want to navigate to the correct locations and create new folders.*

PC users – Program Files/Adobe/Common

Mac users – Library/Application Support/Adobe/Common

1. In Premiere select the clip(s) where you want to apply the LUT.
2. Go to your **Effects** browser and use the search function to pull up **Lumetri Color**. Click and drag it onto your clip.
3. In the **Lumetri Color** panel, under **Creative**, you'll see **Look** with a drop down menu – click on it and you should now see all your LUT(s) listed. Select the preferred look and it will be applied to your clip(s).

How to Add LUTs – After Effects

1. Open After Effects
2. Click on the clip you want to work with.
3. Go to Effects, Color Utility Apply Color Luts
4. Search for the downloaded Luts, click on Lut and Open it

How to Install LUTs – DaVinci Resolve

1. With the program open, navigate to the bottom right corner of the screen and click on the gear/cog icon and choose **Project Settings**.
2. In the left hand menu of the new window, click on **Color Management**.
3. In the section labeled **Lookup Tables**, click on the **Open LUT Folder** button.
4. It will open your Explorer/Finder window. Copy your new LUTs into this folder. Feel free to use a subfolder labeled as you like to organize them further.
5. Back in Resolve, go to the **LUT** section on the **Color** page, right-click in the background area and click **Refresh**. Your new LUT(s) will appear.

How to Install LUTs – Final Cut Pro

1. Select the clip where you want to apply the new LUT.
2. Go to the **Effects Browser** and select **Color** from the menu on the left hand side. You'll see **Custom LUT** in the list of options in the main panel. Double click on it or drag it onto your clip.
3. Go to the **Video Inspector**, click on **Custom LUT**. Use the drop down menu in the first line of options to select **Choose Custom LUT**. Find your file(s), select them and hit Open.
4. The LUT is now installed and you should see the new look on your clips. If you imported multiple LUTs you'll use that same **Custom LUT** drop down menu in the **Video Inspector** to navigate to the others.

How to Install LUTs – Avid Media Composer

1. Select **File**, go to **Settings**. Click on the **User** tab in the menu and then choose **Color Management**.
2. Select **Project** and choose either **Shared** or **Both** depending on if you want the LUT(s) available for all your projects or just the current one.
3. At the bottom of the menu you'll see the option to **Select LUT** file – click that, find your LUT file(s), select them and hit **Open** to install.
4. You will now find your LUT(s) in the **Source** settings panel.

**Note: If you want your LUT(s) for use in ALL projects (new and existing) you will need to create a new folder in the following locations and copy your LUT files there.*

PC users – Program Data/Avid/ColorManagement/

Mac users – Library/Application Support/Avid/ColorManagement/
