## PROJECT EDITION

**Photo** - find smart object named "PHOTO\_EDIT" -> double click on this layer. In newly opened document place your photo and close this document approving changes. To edit "MDMA" main text do the same by clicking (double click) on "TEXT\_EDIT" layer.

**Color** - at the top of layers list find layer named "OVERLAY\_COLOR\_EDIT" -> double click on this layer and use hue bar to edit color

**Fonts** - download all fonts from the links above and install them on your computer before you edit the projects.

## Font Installation - Basic Info

**WinXP** - Start > Control Panel > Appearance and Themes > Fonts (from the 'See Also' panel at the left) > In the Fonts window, select the 'File menu', and choose 'Install New Font'

**Vista** - Start > Control Panel > Appearance and Personalization > Fonts > Click 'File', and then click 'Install New Font.'

**Win7, 8 and 10** - Unzip the fonts first. Fonts cannot be installed if they are zipped. Right click the font file and select 'Install.'

**MAC OS X** - First, close any open applications. Newly installed fonts may not appear in your font menu if you ignore this step. **Install using Font Book:** - Double click the unzipped font file and Font Book will open a preview of the font. - Click "Install Font" at the bottom of the preview. **Manually install:** 1. Open Finder and click the Go menu at the top of the screen. 2. While in the Go menu, hold down both the Alt/Option and Shift keys on your keyboard to reveal the hidden link to the Library folder 3. Navigate to your Fonts folder: /Users/Your\_Username/Library/Fonts 4. Drag and drop the unzipped font files into this folder.

**Search the internet if you need more help with fonts.**

**Remember - every PSD file contains "Remove this layer" layer. Just delete this layer to see entire design.**

*Good luck in your business / Viel Glück in Ihrem Geschäft / Buena suerte en tu negocio*
