

## Acid Photo Effect

1. Open PSD file.
2. Double click on layer “YOUR PHOTO HERE”.

3. Insert your photo. Delete layer “DELETE THIS LAYER”.

4. Close the smart object layer, and select “Yes” in the window.

5. Show one of four effects, and hide the others.
6. Open the “Gradients” folder and select one of them that you like.
7. Export your image by selecting “File” -> ”Save As”.
