## HOW TO EDIT

Open **Realistic_Neon_Photoshop_Effect_DesignDell. psd.**

Double click on the thumbnail of the layer "<< PUT YOUR TEXT IN THIS SMART OBJECT" to open the smart object in a new window.

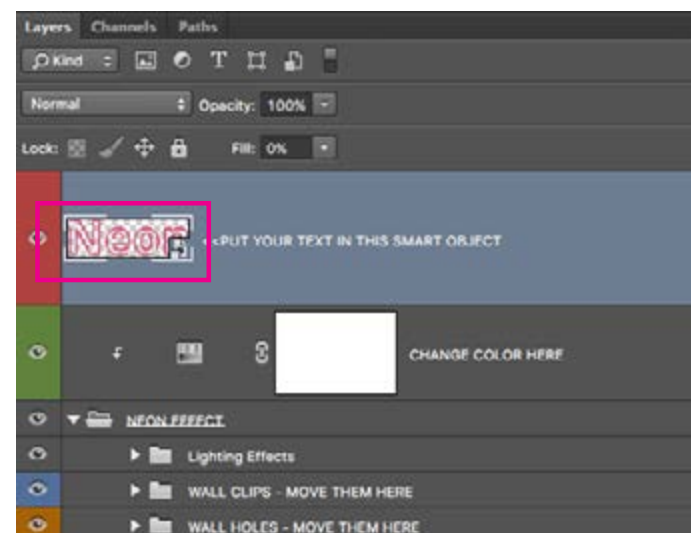

To replace the text, select the layer "<< Replace the text on this layer using the text tool" and select the Type tool (T), then replace the type on this layer with your own.

If you would like to cut out sections of the text where the neons would feed into the wall (like in the cover image examples), then select a black brush to erase (or white to add) and paint onto this mask using the brush tool to get the required effect.

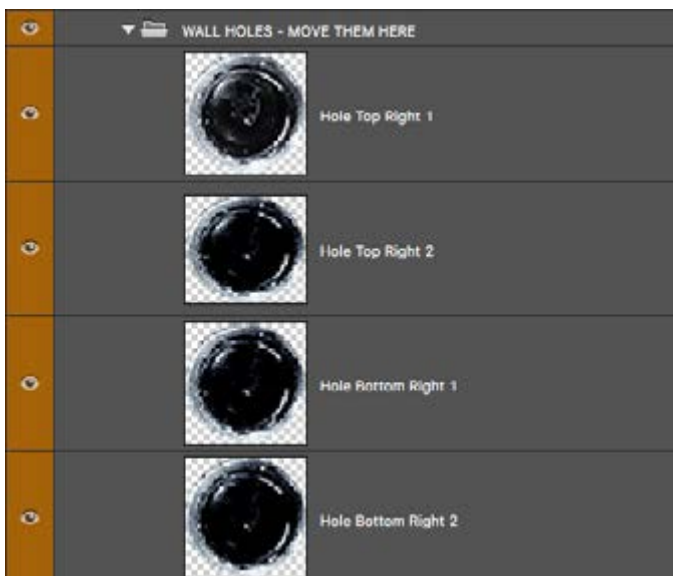

When finished, click 'File' 'Save', to save your edits, then navigate back to the Realistic_Neon_Photoshop_Effect_ DesignDell.psd file. The text should have updated to reflect your changes.

To move the Wall Bolts and Clips, Drop down the WALL CLIPS folder, and select one of the 'Wall Bolt and Clip' folders and move using the selection tool.

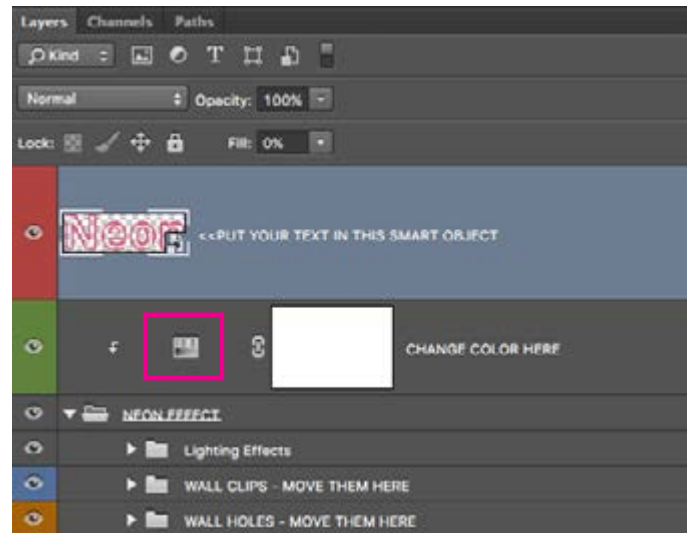

To move the Wall Holes where the Neon feeds into the wall, drop down the WALL HOLES folder, and move one of the Hole layers using the selection tool.

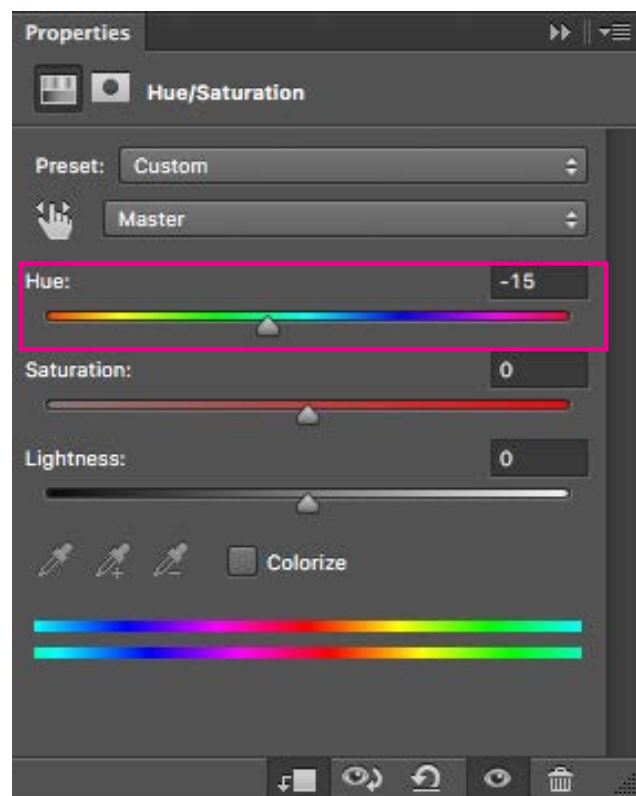

HOW TO CHANGE COLOR

On the 'CHANGE COLOR HERE' adjustment layer, double click on the swatches icon as below.

In the properties window that opens up - edit the hue, lightness and saturation to your liking!

TERMS OF USE

You are free to use Realistic Neon Photoshop Effect on personal or commercial projects. HOWEVER, you may not redistrubute or sell any parts of the product. For example, you may not sell any photoshop elements provided, patterns, actions, layer styles, brushes and imagery in its digital form as your own.
