

PSD PHOTO EFFECT TEMPLATES & MOCKUP's - HOW TO USE GUIDE

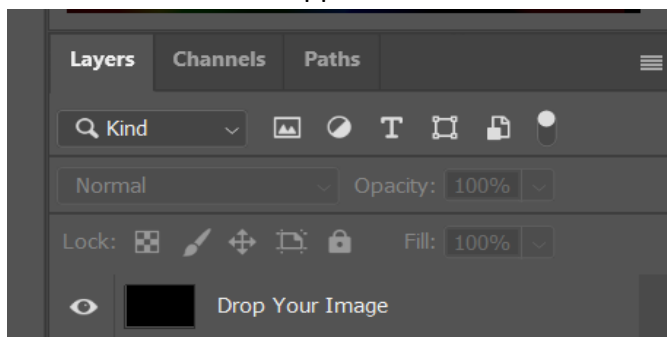

1. Unzip and open the PSD\PSDT file

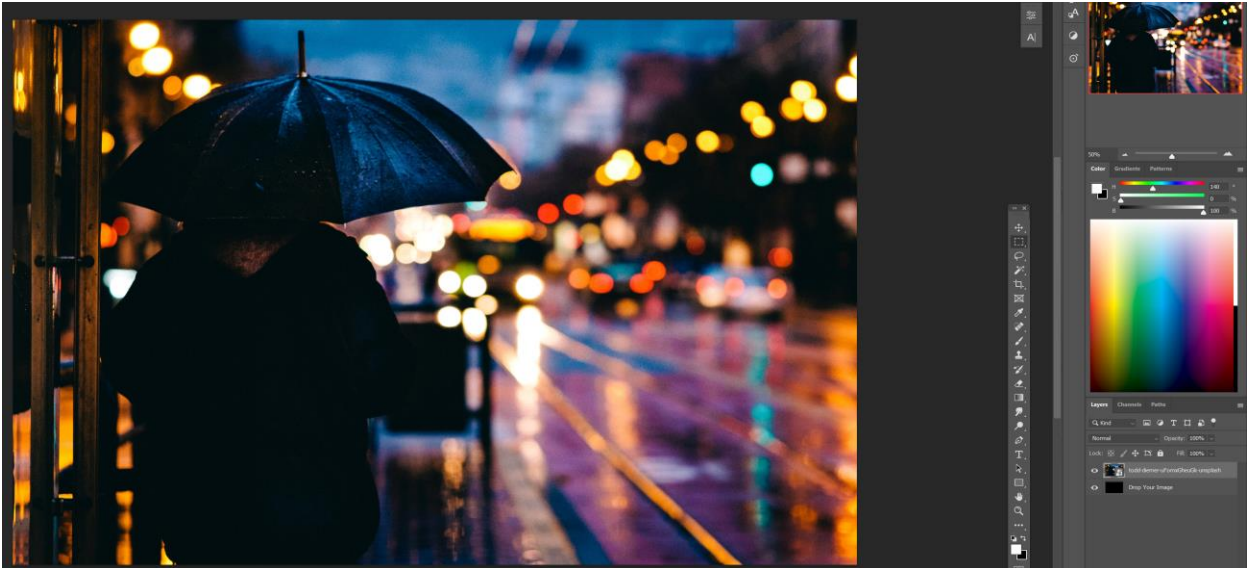

2. You will see a Smart Object layer, called “Edit me” or “Change the image here”, etc. Mostly it is located on the bottom of layers.

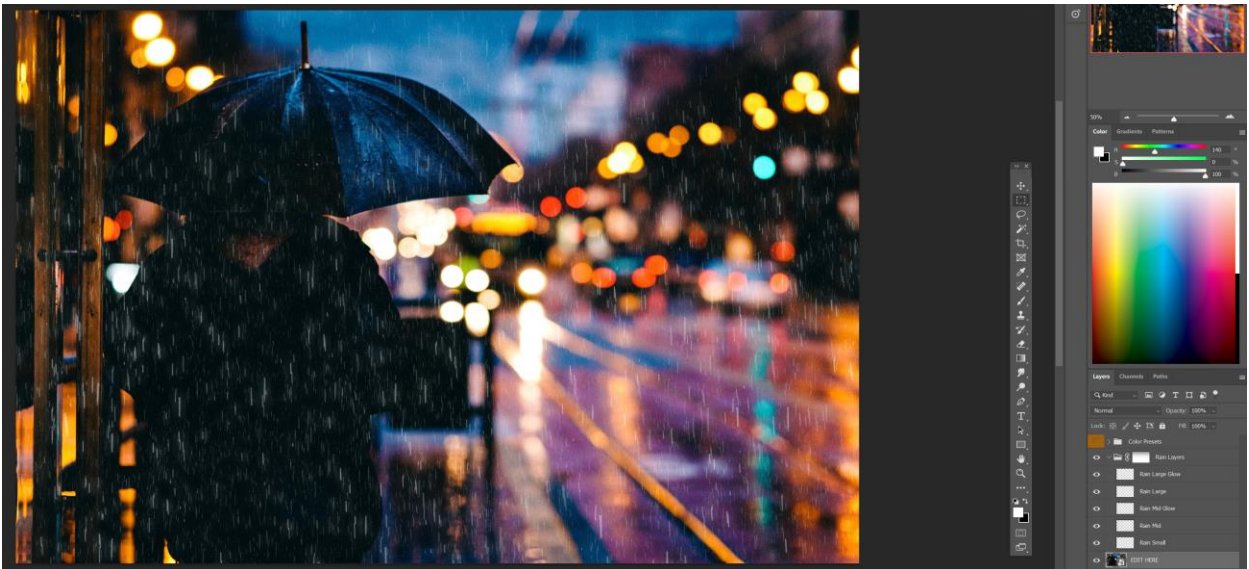

3. Double click on it, or “right mouse click – Edit contents”
The new window will appear

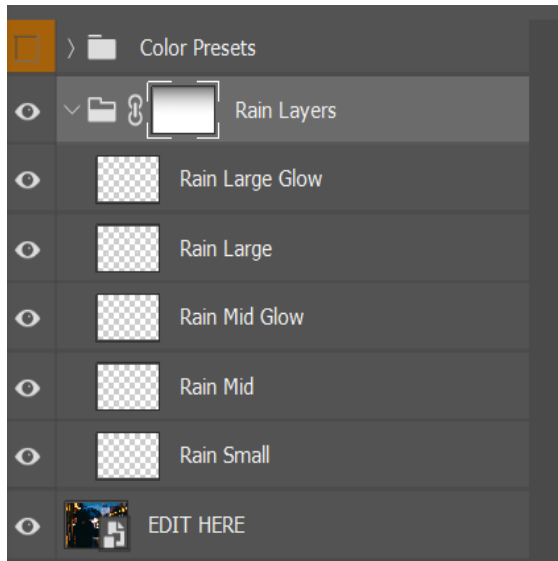

4. Now it is time to place your image into this window

5. Save it (File – Save)
6. Back to your main window. Now this image will appear on the screen with applied effects.

7. Now it is time to adjust the effects, you will find a grouped effect layers on top of the Smart Object.
On\Off layers visibility, change their opacity or duplicate to make the effect stronger and more intensive. Also you can move and transform these layers. A lot of possibilities!

8. Also, in some templates you can find a Color Presets group that will help you to achieve additional color mood for the current effect.
9. Have fun!
