

HOW TO INSTALL PRESETS IN FREE LIGHTROOM MOBILE APP

Latest version of the app installed:

Download

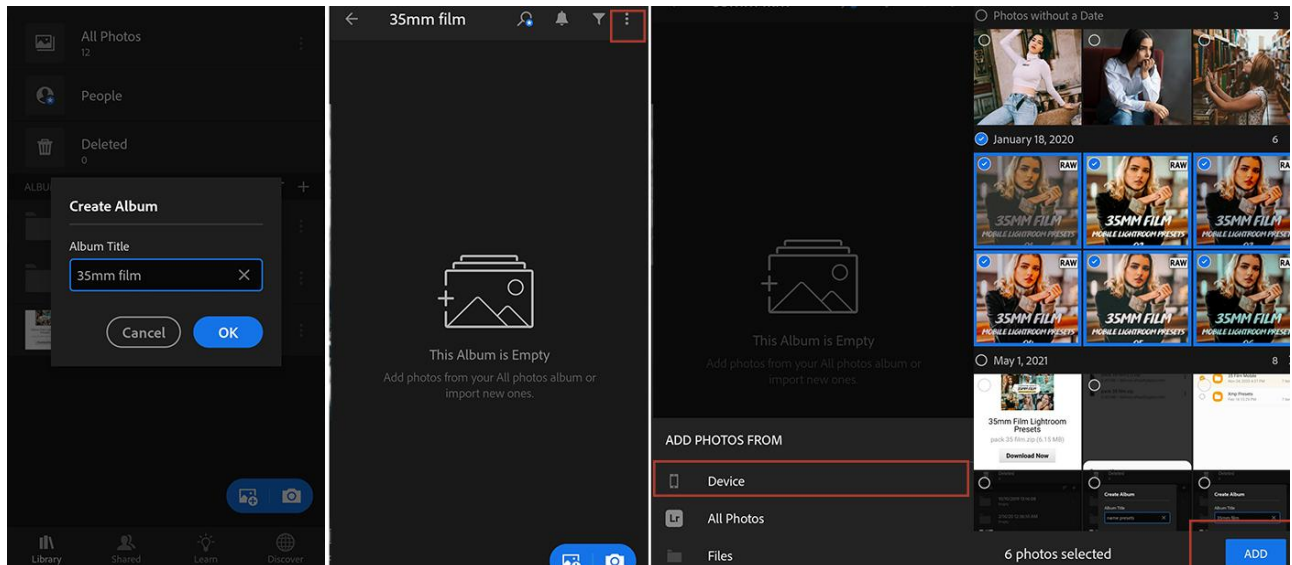

1. Download the DNG files to your phone. The presets come in a DNG file format. the files into a ZIP format.
2. You can use apps like iZip to unzip the file on your phone without a desktop computer. First make sure you download the iZip app to your phone ([iOS](#) or [Android](#)). Then click to download the file and tap on Open in iZip

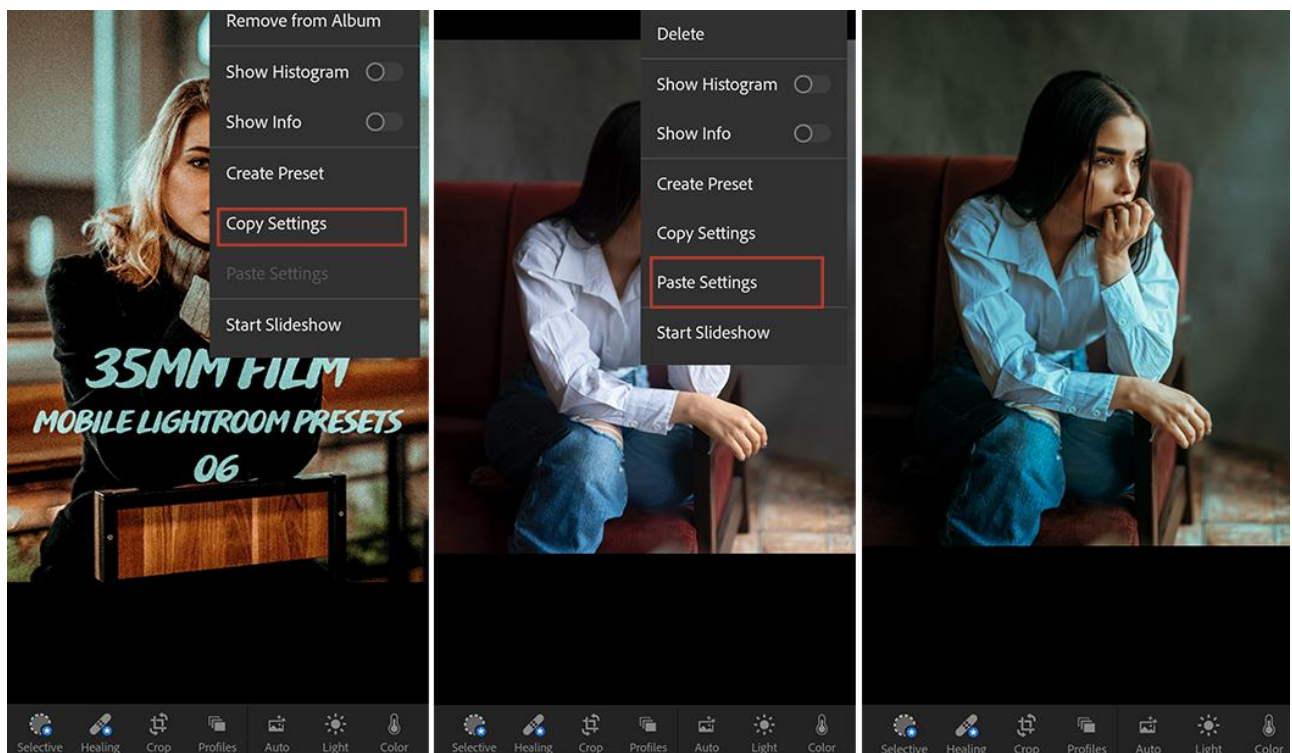

3. Select the DNG presets from your camera roll (or from iZIP) and import them into your Lightroom Mobile app It will have the RAW label on it.
4. Tap the DNG file you imported. Click on the 3-dot (...) icon at the top right corner.
5. Select "Create Preset". This will save the settings that you can use for all your photos.
6. Name the preset, ideally the same as the DNG file. Select a folder to add the preset to or create a new one. Remember where you save it

to so you can find the preset later on.

- Open the photo that you want to apply the preset to. Select Presets from the bottom tool slider

- Select the folder where you save the presets, then tap the preset to apply.

And that's it! Now you know how to install, save and use your Lightroom Mobile presets
