Change Your Photo

- Open PSD file.
- Double click on Smart Object (thumbnail) "Photo".
- Go to the new opened window and place your photo, position it and then click Save.
- The first open file changes occurred.

Replace the Text

- Download and instal the fonts listed in 'FileInfo' file.
- Click on the Type Tool in the left tool bar.
- Select the text with the Type Cursor.
- Delete existing text and type your own.

Change shape's color

- Double-click the color thumbnail on the left in the shape layer. The Color Picker appears.
- Choose desired color. Press ok.

What is the Red Border for?

- The red border marks the bleed area (0,125 in on each side).
- It will get trimmed off during productions.
- When you're done designing, hide or delete the Bleed group layer.

  *IF YOU DONT NEED A BLEED AREA.
- Go to Image > Canvas Size and set the size 0,25 in less than existing size.
