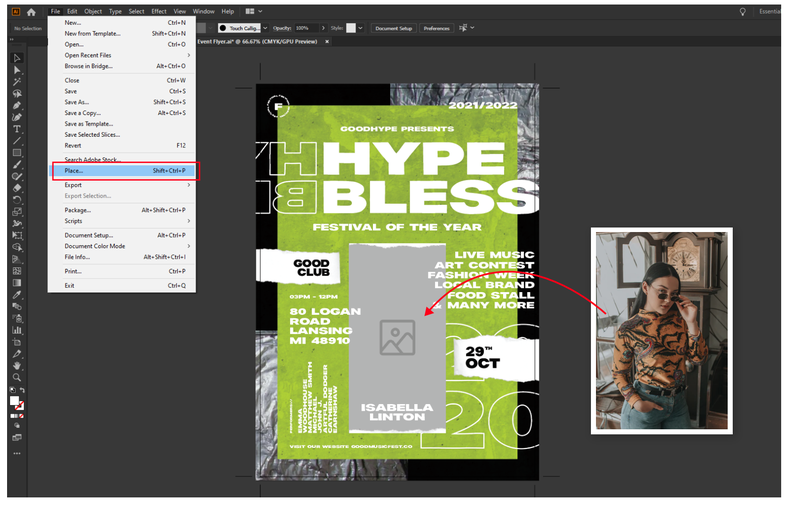
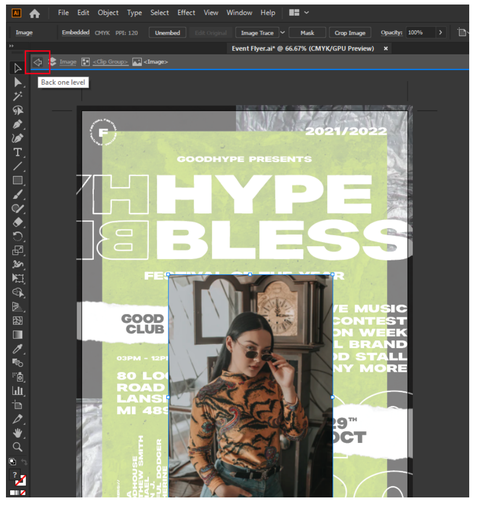
Ai How To Change Image using clipping mask

1. Open the file.
2. Double click the **image icon** to get inside the masking. (highlighted in red)



3. The surrounding graphic will now look transparent, insert the image you want into the Illustrator by going to **File** > **Place**. Afterwards, you may resize and reposition the image.



4. Once you have done editing the image, click **Back** one level on the top left corner.

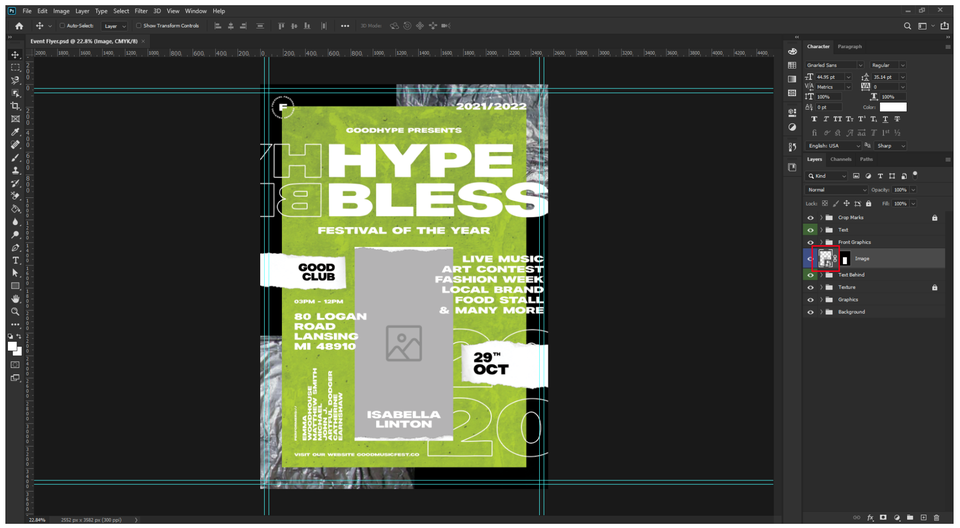
5. Finish, if you want to change the image again, back to point 1, but instead of clicking the image icon, you can just **double click** your new image.

Ps How To Change Image using smart object

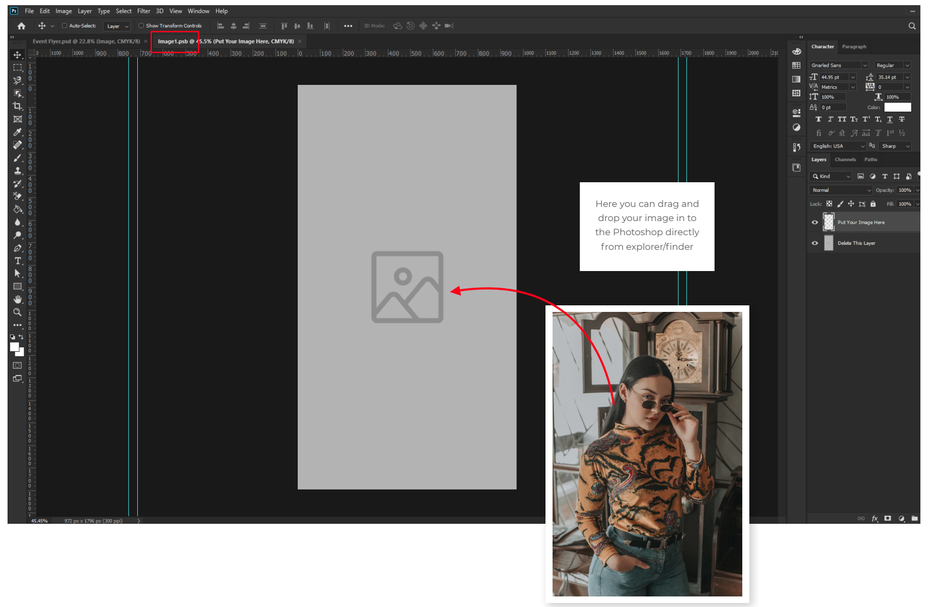
1. Open the file and go to **layers tab**

2. In layers tab you can find group with name **Images**

3. Double click the **image icon** layer (highlighted in red)



4. After you double click the image icon, you'll get inside the **.psb**

Here you can **drag and drop** your **image** in to the Photoshop directly from **explorer/finder**


After you place the image, navigate to...
- **File** > **Save**
(Ctrl + S) / (CMD + S)
- **File** > **Close**
(Ctrl + W) / (CMD + W)
