

## HOW TO INSTALL PHOTOSHOP LAYER STYLES

In your zip file, you should have a .asl file call “Foiled\_DesignDell.asl”.

On a mac, you can simply drag and drop the .asl onto your photoshop application icon in your dock, or follow these steps to install manually:

### To Load Styles:

Open your Styles panel (window>styles) click on the fly-out menu  on the top right corner of the style palette, select ‘Load Styles’, or ‘import styles’ on newer versions, then navigate to the ‘Foiled\_DesignDell.asl’ file on your computer, and click ‘Open’. The Layer styles will be added to your style palette.

---

You are free to use DesignDell's products on personal or commercial projects. HOWEVER, you may not redistribute or sell any parts of the product. For example, you may not sell any photoshop elements provided, patterns, actions, layer styles, brushes and imagery in its digital form as your own.

Should you have any other issues, please contact me at [hello@designdell.com](mailto:hello@designdell.com) so that I can correct the issue and make things right - my customers are very important to me.

Please keep in mind that I am from Australia so there may be a delay in my reply depending on your location but I will reply as soon as I can.

**If you found my product useful  
please help out a new shop owner  
and recommend it**

(if you didn't, that makes me sad - and I'd also love to get your feedback so that I can further improve my products!)
