## CONFIGURE PHOTOSHOP

• **Make sure you are using the English version of Photoshop.**

• **Use the RGB Mode and 8 Bits color.**
   To check these settings, go to **Image ---> Mode** and check the **"RGB color"** and **"8 Bits/Channel"**.

• **Make sure that the option "Add 'copy' to Copied Layers and Groups" and "Use Default Masks on Fill Layers" is turned on.**
   On the "LAYERS" panel, click the hamburger menu icon and go to **"Panel Options"**
   and check that the **"Add 'copy' to Copied Layers and Groups"** is turned on. **"Use Default Masks on Fill Layers"** is turned on.

---

## INSTALL THE ACTION

*Method 1:*
1. Drag and drop **"Xerox Joint Effect.atn"** file into Photoshop.

*Method 2:*
1. Go to **Window ---> Actions**.
2. Press the hamburger menu and select **Load Actions**.
3. Select the **"Xerox Joint Effect.atn"** file and click **Open** to install.

# USE THE ACTION

1. Select a layer
2. Select action in the Actions panel (Choose one of 5 different presets)
3. Press Play to render the effect

After the render is finished, double-click on the "Intensity Slider" icon inside the group.
Move the Threshold slider to change the intensity.

Navigate to "Color Setup" to change the color.

There are two slider control layers inside the "Overlay Textures" group.
Double-click on the "Intensity Slider" icon, move the slider to add or remove spill and dust or scan lines.

*Clip mode / Full mode*
Outputs within two modes but with the same "Intensity Slider" value work differently.
In the Full mode output, the "Intensity Slider" controls the darkest parts of the image.
