1. Prepare the DNG file and save it on your smartphone device memory
2. Then open the lightroom app and select add photo
3. Look for previously prepared DNG file photos
4. After that, open the file through lightroom and press the three dots in the upper right corner and select copy settings or presets
5. If it has been successfully copied out of the photo and find the photo you want to edit
6. When it's open, just click the three dots above the right corner again and then select paste settings
