

LUNE PRESETS INSTALLATION GUIDE

The process of downloading and installing Lightroom presets is the easiest thing ever! Don't worry, we will guide you through the entire steps ♡ °

HOW TO INSTALL THE LIGHTROOM PRESETS ON IPHONE AND ANDROID ✧.*

PRECISIONS FOR IPHONE USERS ✧.*

- Make sure you have these two apps (Lightroom mobile + zip extractor (you can download any zip extractor because they do the same job)).

1- DOWNLOAD AND IMPORT ✧.*

- You'll receive a notification with a button "download the preset zip file "
- Click directly the button to download the file on your phone
- Open up the preset file in zip extractor (android users can skip this step because they can automatically unzip compressed files)
- Now you'll be able to download the DNG file
- Click on the DNG preset file
- tap the preset
- click the option " Open In" and choose Lightroom

It will allow you to upload the preset as an image in your Lightroom mobile app.

2- SAVING THE PRESETS IN LIGHTROOM AS YOURS

After opening a dng preset file in your Lightroom mobile app:

- Click on the three dots in the top right corner of your Lightroom app
- Tap the option "create preset"
- Give it a name of your choice ;)!
- Make sure all the boxes are selected

- Tap the “√” button on the top right corner to save the preset
- And now it’s all *YOURS!*

3- *ADD THE MAGIC TOUCH ON YOUR PHOTOS*

- Open the photo you want to edit
- Select “presets” from the bottom tool slider
- Scroll until you find your presets
- Click on them to apply
- Enjoy yourself by clicking on the variety of presets to see how it suits your photos!

If you have any question, you can always ask me! You can contact me on my socials:
