

A Quick Tutorial

ON HOW TO USE THE FILES

- 01.** If you want to add in your own designs, then click on the “Design Here” layer that will open up a new smart object. Just place your design there and save the file when you’re done!
- 02.** You can also add your own background by replacing the BG layer (marked with number 2).
- 03.** You can adjust the color of the cap & bulb with layers marked with number 3.
- 04.** If you want to adjust the overlay light intensity, you can do so from the layer group marked with number 4. (Sometimes when you have a really dark design, you may want to tone down the effect by reducing the “Overlay Light” opacity.)

THANK YOU
