OXYGEN ART
PRESETS

Introduction

We are thrilled to present our latest collection of 10 Cinematic Lightroom presets, meticulously crafted for both the mobile and desktop versions of the popular Lightroom app. These presets have been meticulously developed to elevate your photographs by imparting a clean, vibrant, and truly captivating film stills aesthetic. With an expansive range of tones, spanning from mesmerizing moody blues to warm rustic browns and enchanting deep greens, our presets guarantee to breathe new life into your images.

Designed with utmost precision and attention to detail, our presets cater to a diverse array of individuals, including travel bloggers, social media influencers, and anyone seeking to transform their Instagram feed or blog into a captivating visual experience. Imagine the ability to effortlessly transport your audience into a world of cinematic beauty, where every photograph captures their attention and leaves a lasting impression.

Each preset within this collection has been artfully curated to enhance your images, adding a touch of uniqueness and distinctiveness that sets them apart. We understand that your photographs are an extension of your creativity and personal style, which is why our presets offer a high level of versatility. You have the freedom to further customize and fine-tune each preset to perfectly align with your specific vision and preferences.
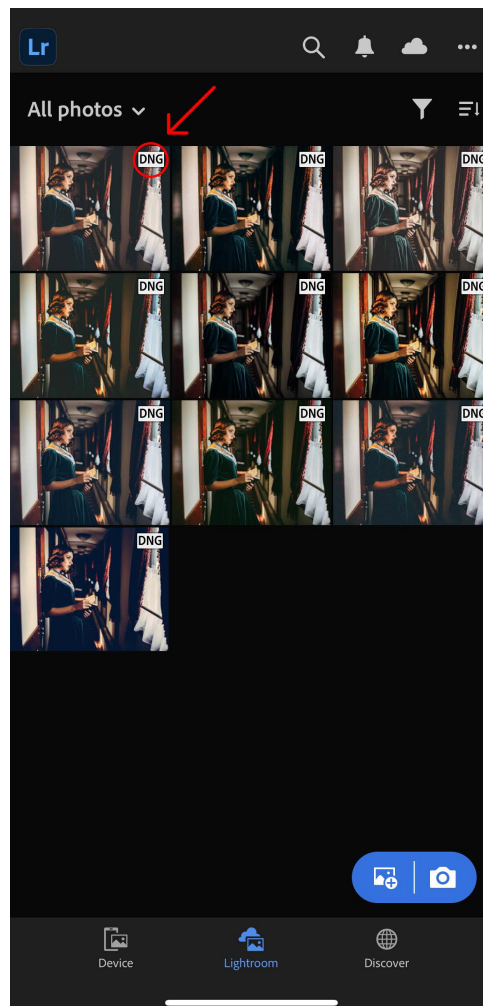

Mobile Presets

To install the presets on Lightroom Mobile, you need to transfer the Mobile Presets to your device, we recommended this way by using Snapdrop service to share the files between devices easily.
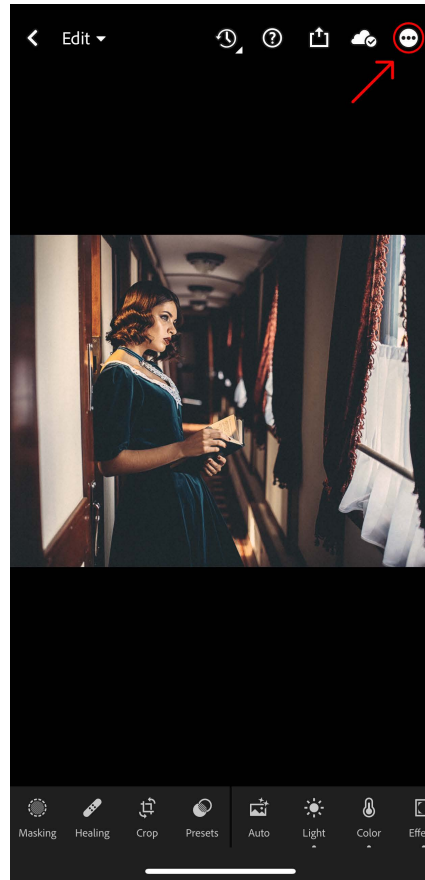

Tutorial: https://www.youtube.com/watch?v   kkARf dx

Once you got the presets inside your mobile, you need to open them inside your Lightroom Mobile.
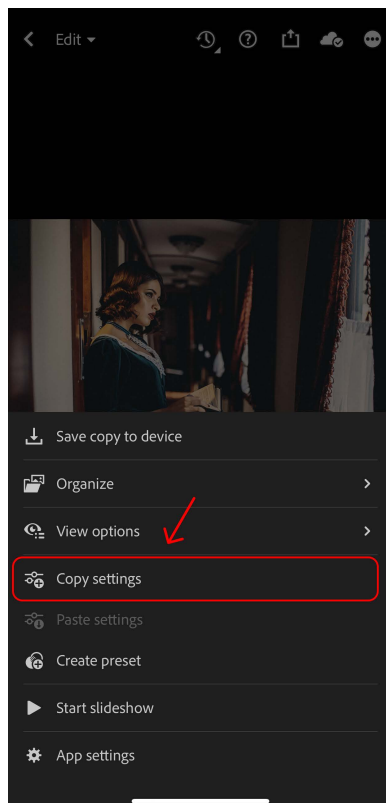

All presets in Lightroom Mobile have the DNG badge on the preview, choose your favorite preset and open it.
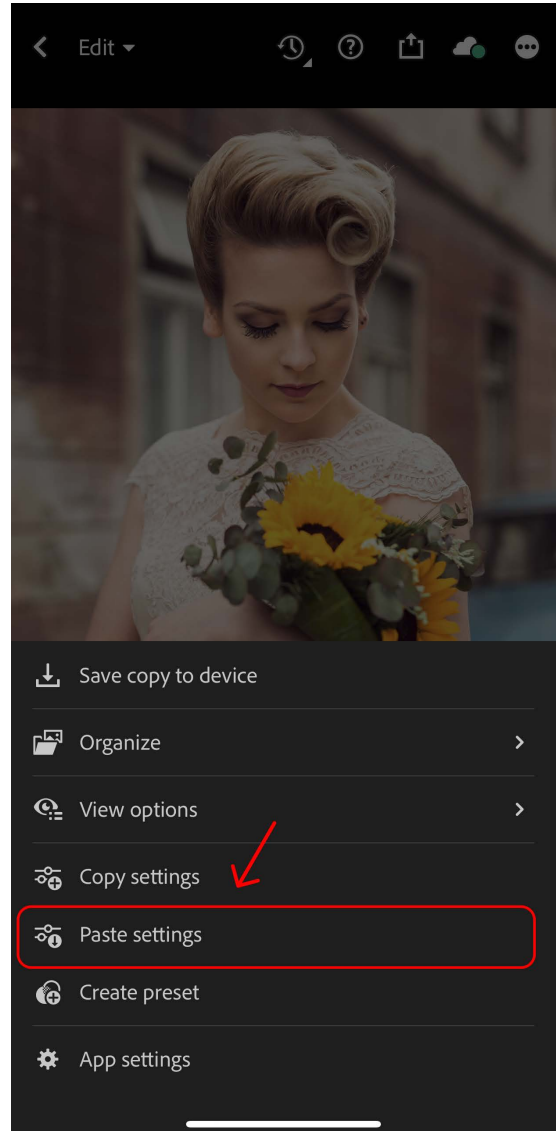

Tap on the Meni Icon in the top right corner to show the presets options.

From the showed menu, select Copy settings, then confirm the settings that you wish to apply later.

Next, open your image that your want to apply the settings on it, and tap on the menu icon again in the top right corner, then from the showed menu, select Paste settings, That's it!
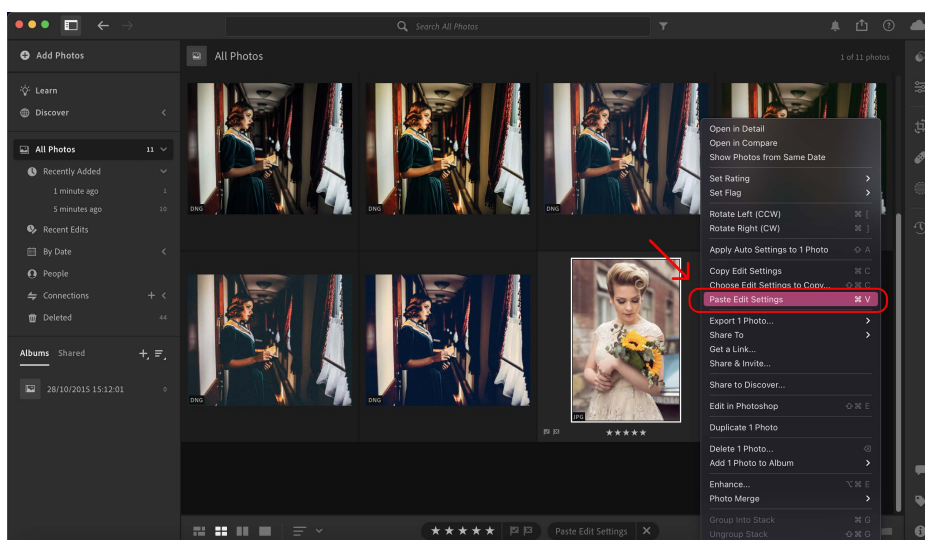

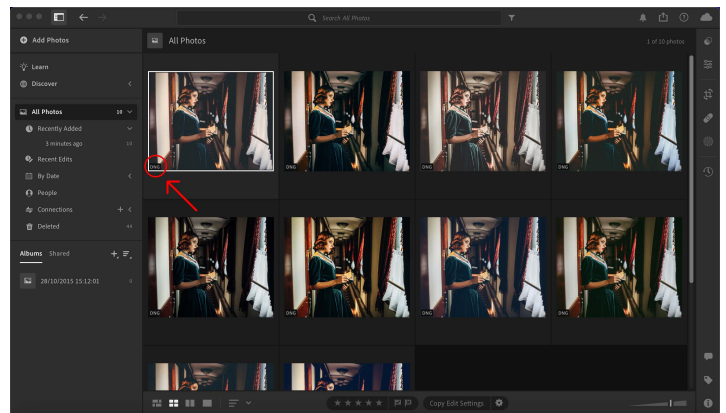

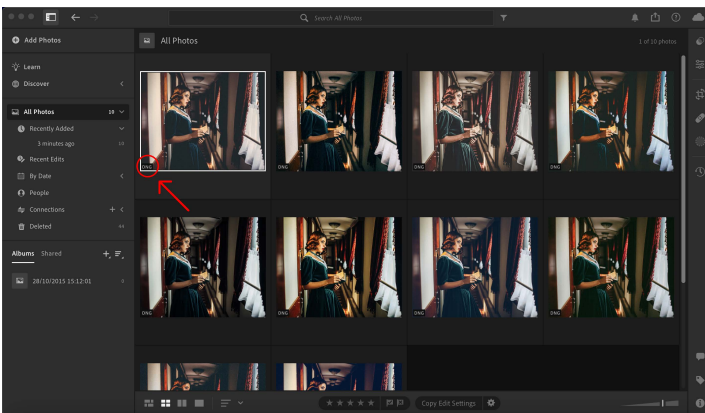

Desktop Presets

01. Lightroom (Newest)

To install& apply the presets on Lightroom Desktop, open the *.dng files inside the Lightroom app, you can find them inside the Mobile Folder.

NOTE: the *.xmp files will not work with the newest version of Lightroom, they work only for Lightroom Classic (see the Lightroom Classic guide).

Open your favorite preset, then right click on it, & click on Copy Settings.

Next open your image that you want to apply the settings on it inside Lightroom, and right click on it and select Paste settings, That's it.
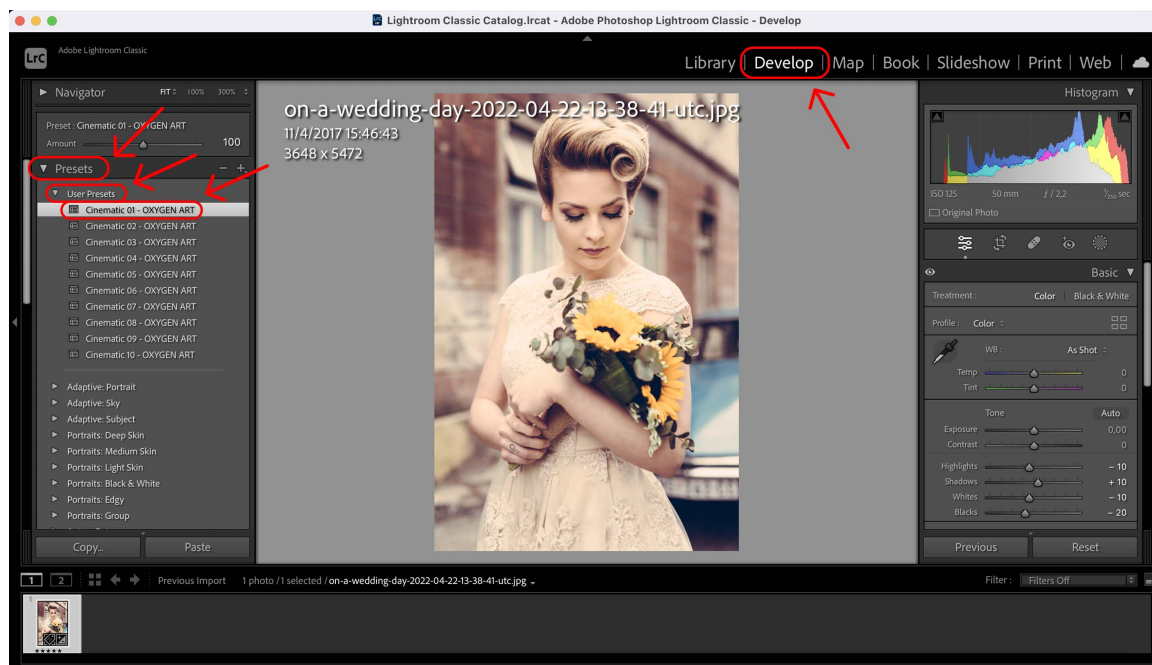

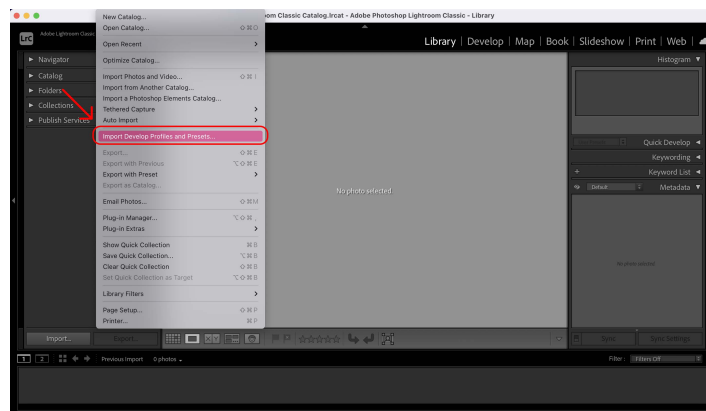

02. Lightroom (Classic)

To install & Apply the presets on Lightroom Classic, you need to open *.dng files and *.xmp files inside Lightroom Classic, but the recommanded files are *.xmp ones.

Click on File >> Import Develop Profiles and Presets ..., Then select the *.xmp files from the downloaded folder, they are located in Desktop Folder, then import them.

Next open your image that you want to apply the settings on it inside Lightroom classic, Click on Develop Tab.

From the side bar you will find a Presets field, open it, then open User Presets field, & apply the installed presets, That's it.

If you like our products support us with 5 stars review, this will help us a lot, Thank you!
