# Presets - Getting started in Lightroom Mobile

1 - Open the ZIP file

1.1 Open the ZIP file and save all .dng presets to your camera roll, files or downloaded. You can also using PC to open the ZIP file and move all .dng files to your phone.
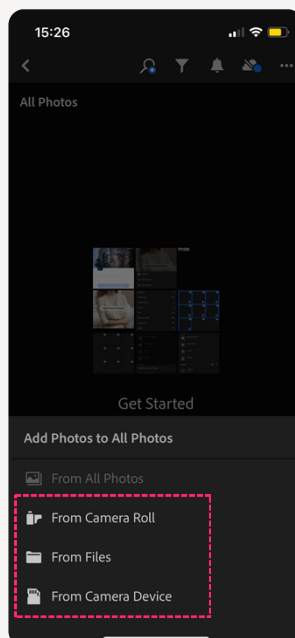

1.2 If you are not able open the ZIP file on your own leave me message and we will help you.
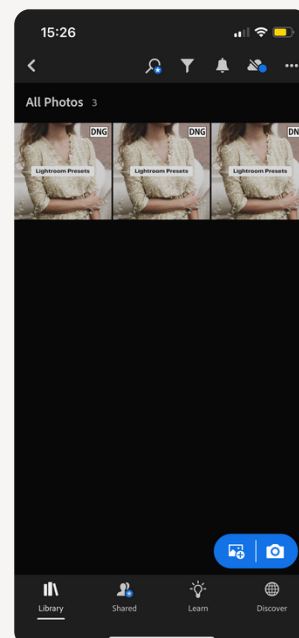

2 - Save presets to your phone

2.1 Open Lightroom Mobile App to start, and follow all the steps.

3.2 Click on the "Add Photo" Icon

3.3 Click to one of this option, were you have saved the .dng files

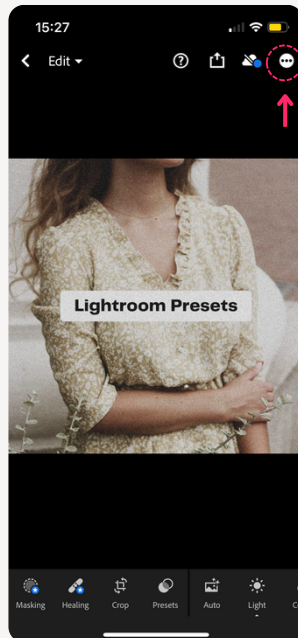

3.4 You can see the downloaded .dng files
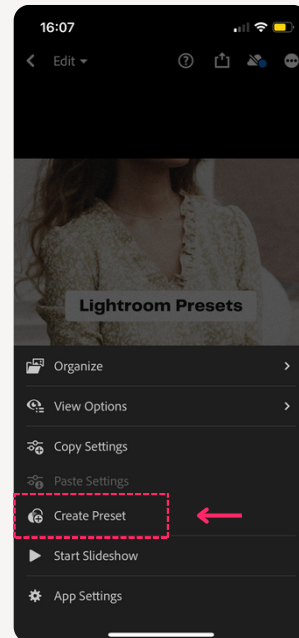

3 - Add Presets to Lightroom

Start adding presets to Lightroom mobile. Follow all the steps.

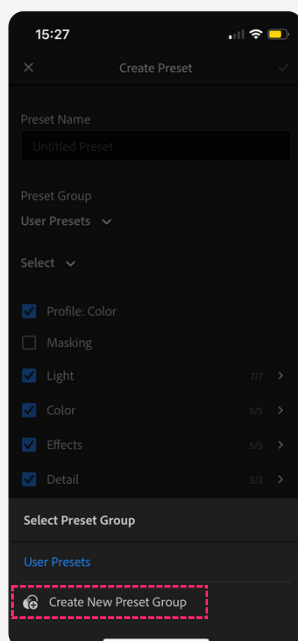

3.1 Select one of the presets.

3.2 Click on the three dot right in the top

3.3 Click "Create Preset"

3.4 Add preset name and add a new "Preset Group" or use "User Presets"

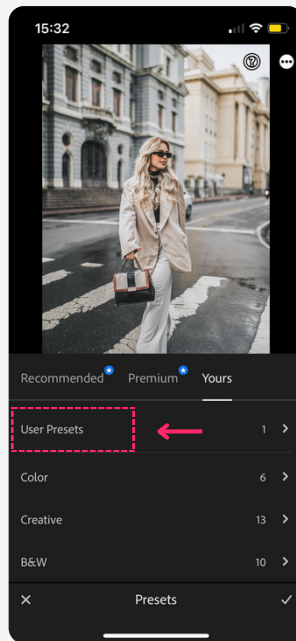

3.4.1 To create a new "Preset Group" click this

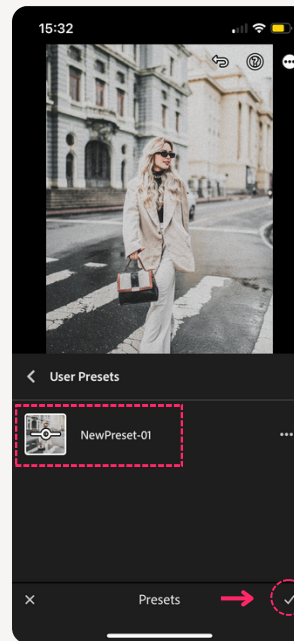

3.5 You must do this now with all presets from this pack
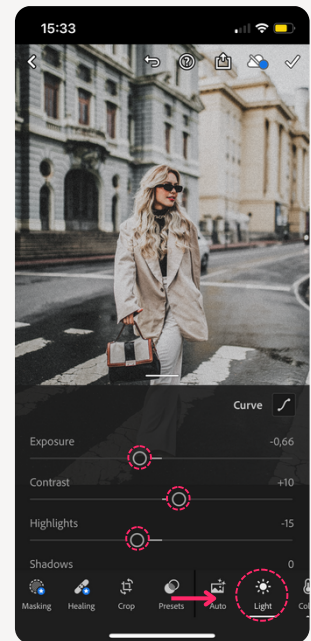

4 - Use the presets on you photos

4.1 Selected a image and click on "Presets"

4.2 Click "User Presets" or your created folder

4.3 Select a preset and click the checkbox

NOTE: After applying a preset, you can make additional settings to adjust the preset settings for better editing results.

Note: Please remember that all presets work differently on every image. Due to the nature that every photo is different (shot in a different light, etc.), you may need to make minor adjustments to the edit after the preset is applied.
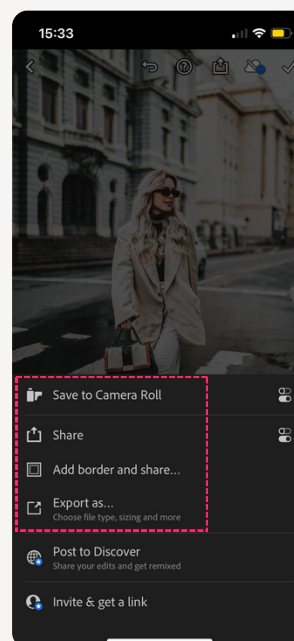

5 - Check (before & after) and save

5.1 Hold your finger on the display to see the before and after

5.2 To save click the icon in top

5.3 Choose one of this option to save or share your image
