HOW TO INSTALL PRESETS
in Adobe PHOTOSHOP
—CAMERA RAW Filter

1. Open *Photoshop* and select the *photo* you want to apply the preset to.

2. Go to the *Filter* menu and select Camera Raw Filter.

3. The *Camera Raw* dialog box will open.

4. Click on the *Presets* panel.

5. There are *Two ways* to import presets in Camera Raw:

   • *Import* presets from a folder: Click on the Import Presets *button* and browse to the folder where you *saved* the preset file. Click on the *Open* button to import the preset.

   • *Import* presets from a Lightroom preset pack: Click on the Presets panel *dropdown* menu and *select* Get More Presets. This will open the Lightroom Presets *Manager*. Click on the *Catalog tab* and browse to the preset pack you want to install. Click on the Install button to install the preset pack.

6. The preset will be *imported* into Camera Raw.

7. Select the preset you want to *apply* to your photo.

8. Click on the *Apply* button.

Your photo will now be *transformed* with the preset that you selected.

You can *adjust* the settings of the preset to fine-tune the look of your photo.

I hope this helps! Let me know if you have other questions.
