

Hello!

**Thank you for downloading this item. Before using the template, please read the steps below to avoid mistakes.**

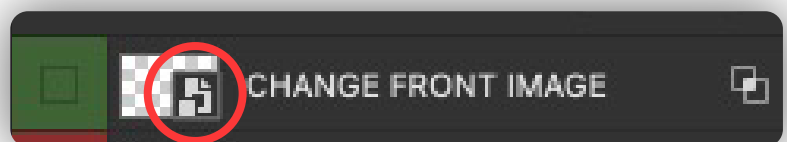

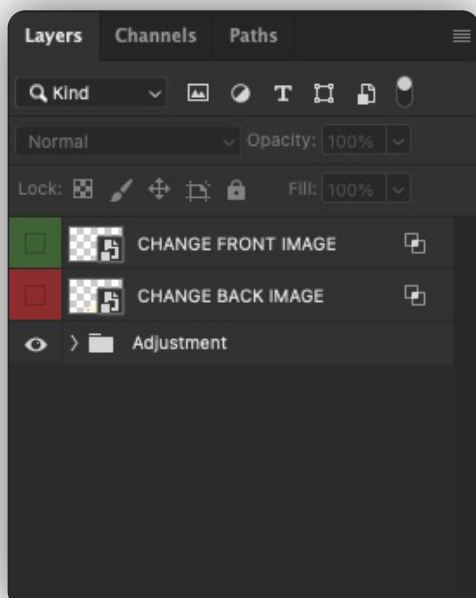

## Step 1

Open the file as usual.

## Step 2

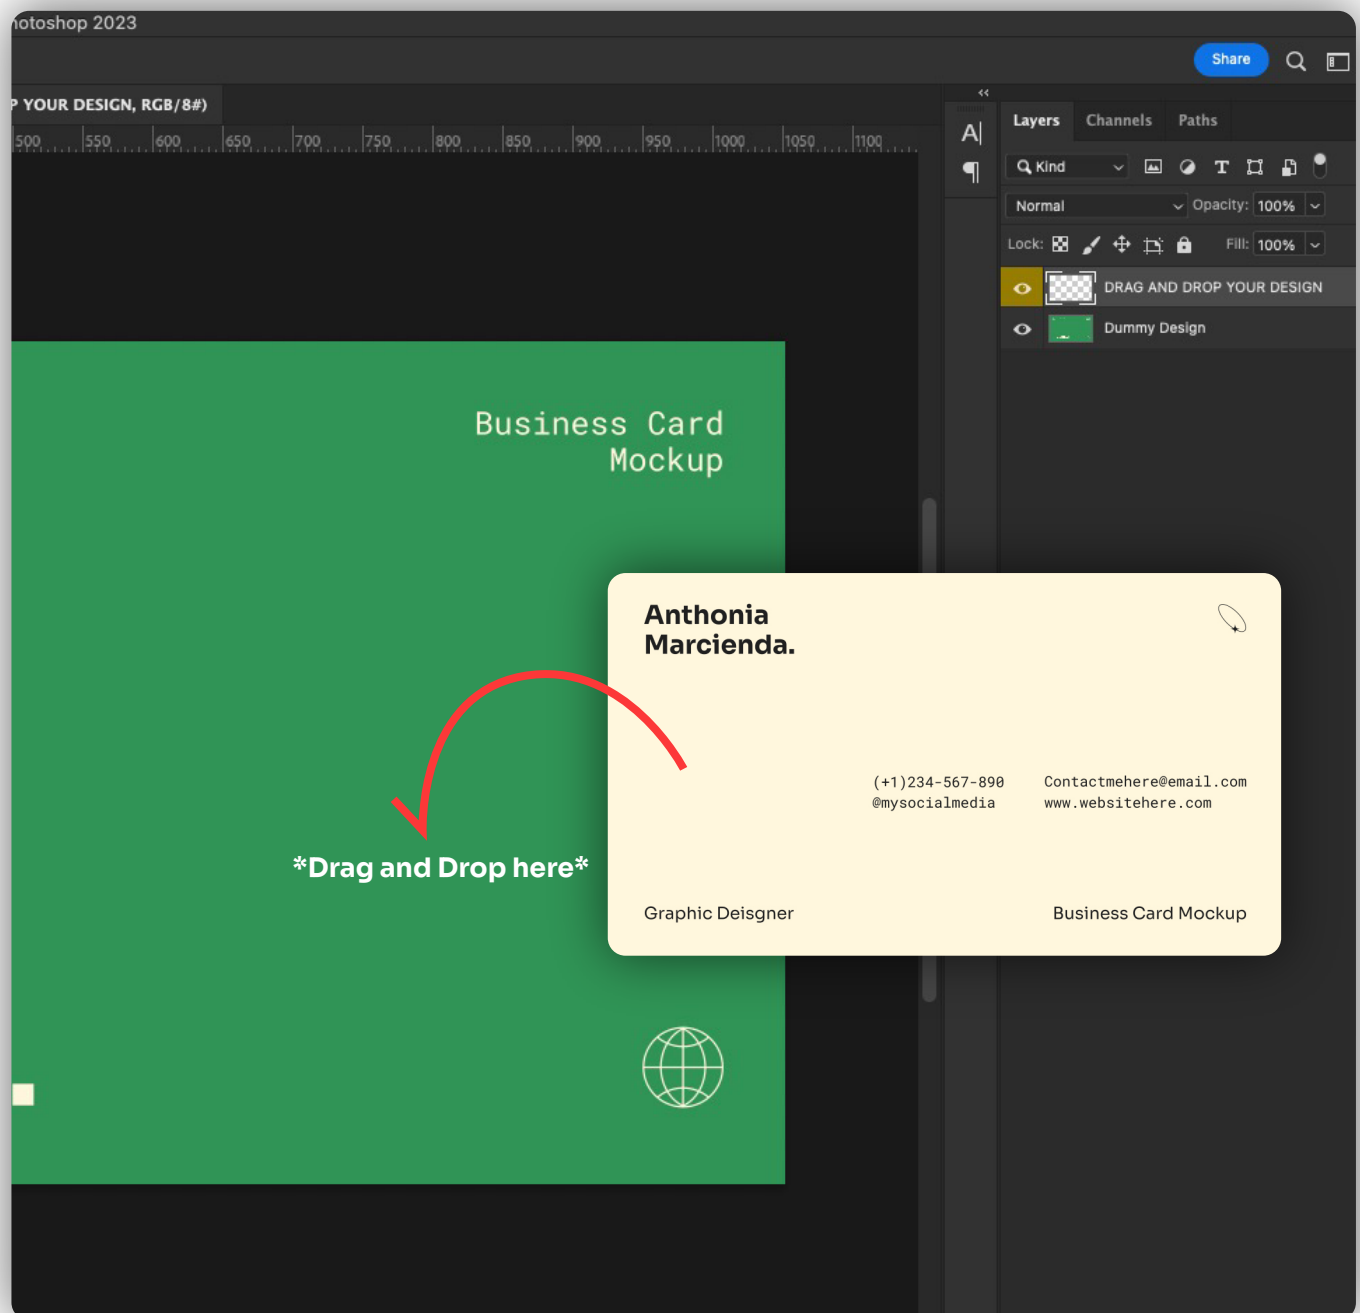

Inside the file there are colored layer as an image placeholder

Double click this icon to open the smart object and you will directed to another tab

## Step 3

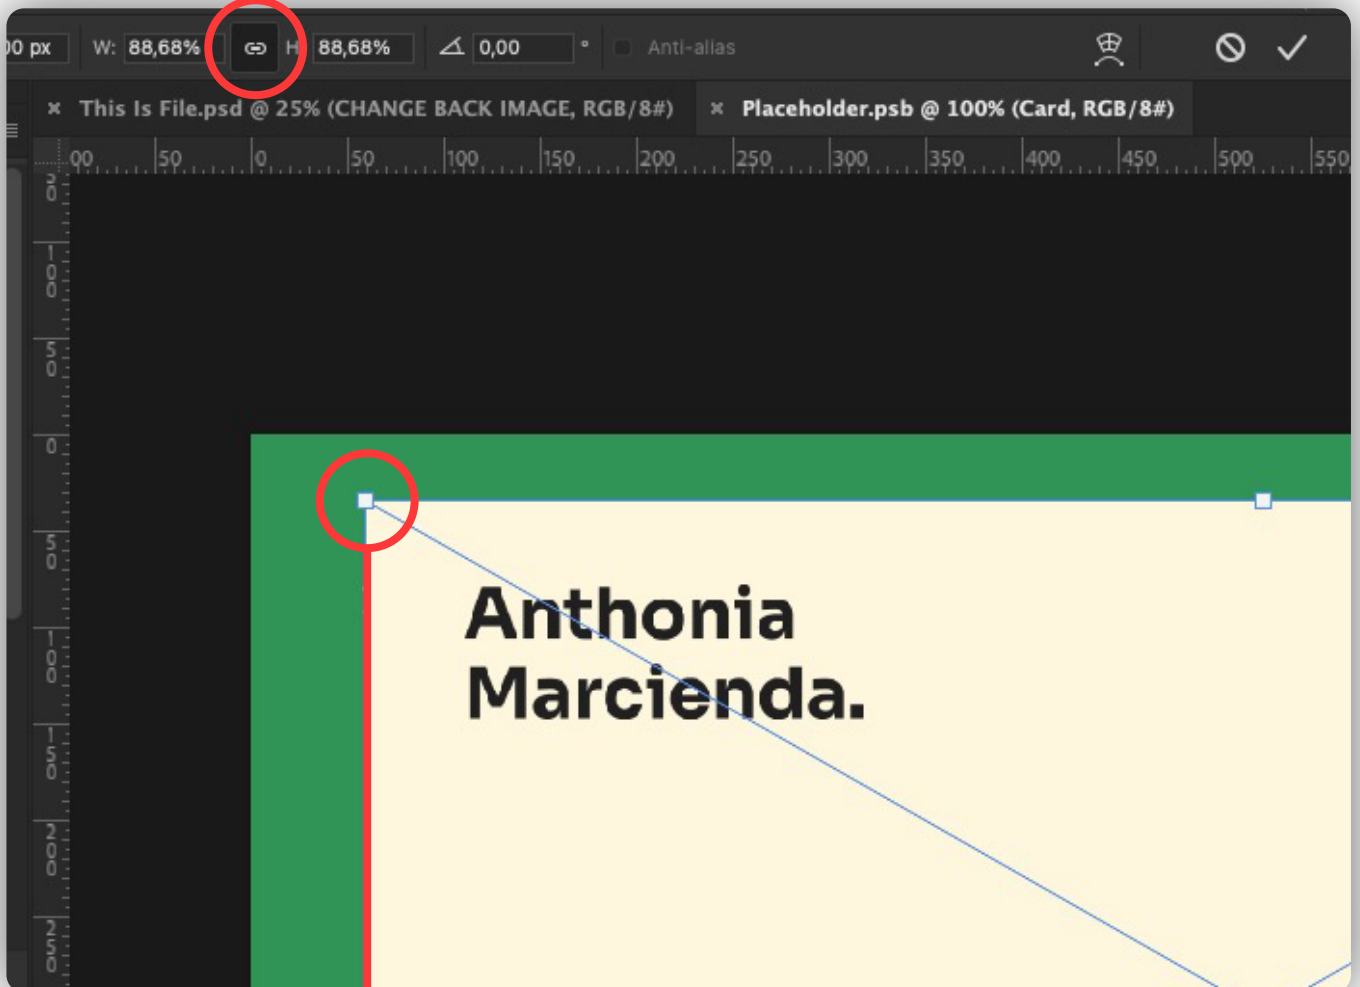

After the placeholder opened, you will see the Drag and Drop layer. Simply select the layer and then drag and drop your image on the artboard.

## Step 4

If your image doesn't fit the artboard, adjust the size by simply dragging the corner of the image until it fill the artboard.

\*Make sure the chain symbol active to keep the image ratio

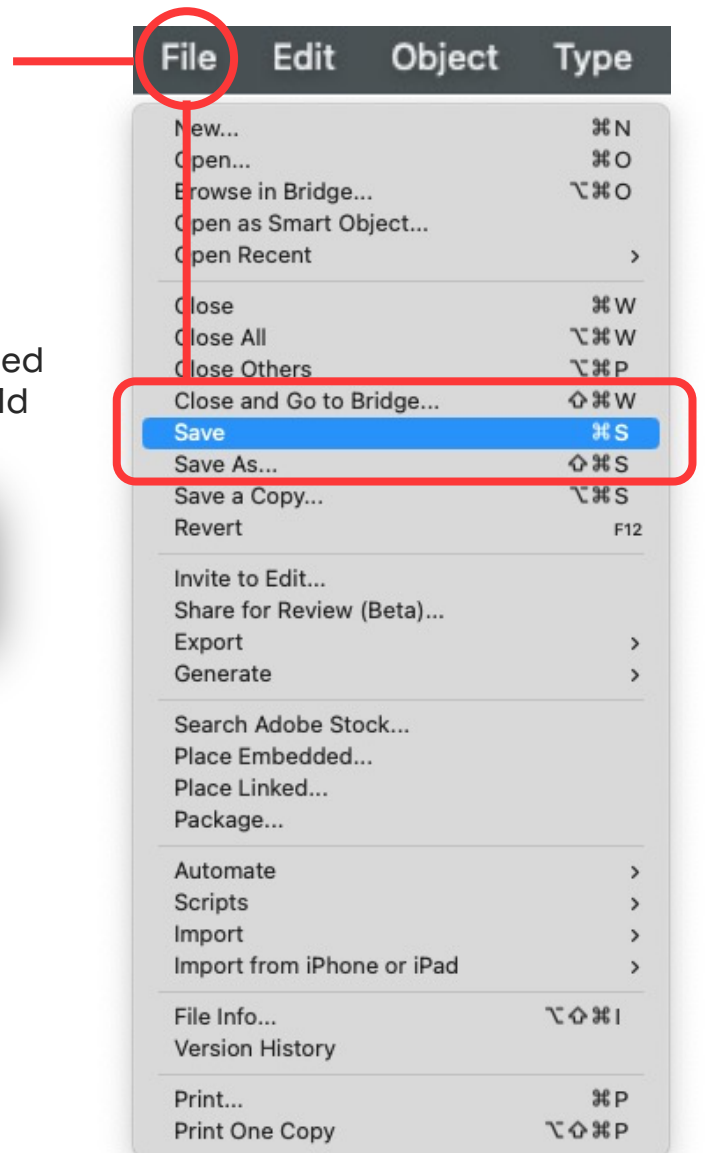

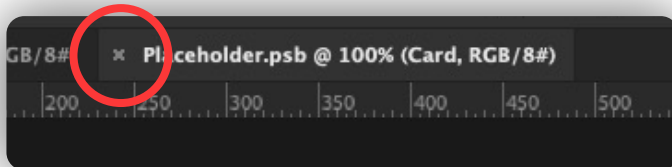

You can drag the corner like this to resize the image, after that you can hit **Enter** to apply the size

## Step 4

Save the placeholder by clicking the File > Save or simply pressing Ctrl+S (Windows) or Cmd+S (Mac Os)

## Step 5

Close the current tab and you will be directed to the previous file tab. Your image should appear on the mockup now.

**Thank You!**
