

# HOW TO USE MOCKUP IN PHOTOSHOP

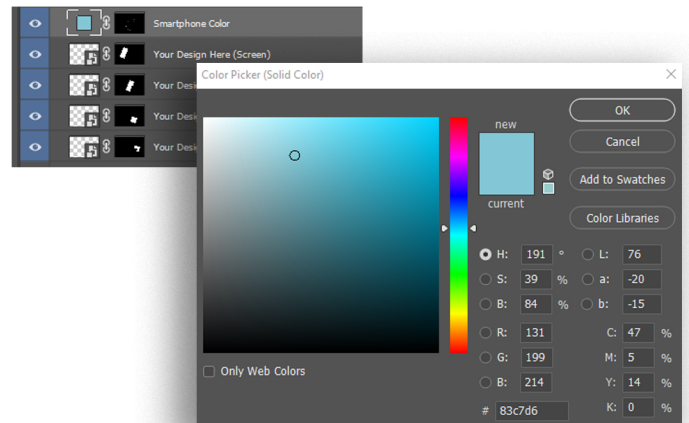

## Add your design

- ✓ Open an item group folder from the layer panel in Photoshop.
- ✓ Double-click on the smart-object layer and a new document opens to add your design.
- ✓ Copy and paste your design or File > Place Embedded and select your design from your computer and place it in the document.
- ✓ Save all changes and close the document. Changes will then be applied to the mockup.

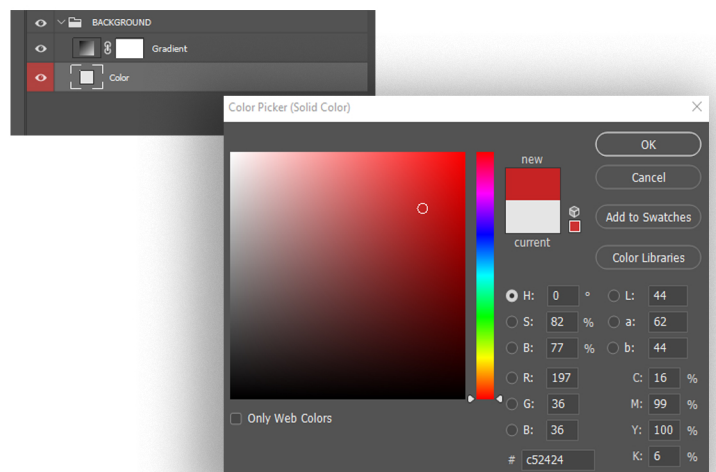

## Change Item Color

- ✓ Open the item's folder and double-click on the Change Color (Item) solid color to open the Color Picker panel. Choose your color and hit OK.

## Change Background Color

- ✓ Open the item's folder and double-click on the Change Color (Item) solid color to open the Color Picker panel. Choose your color and hit OK.
