

How to Edit Smart Objects

- Select the PSD file that you want to edit using Adobe Photoshop.
- Identify Smart Objects in the layers panel to find the element you want to change.
- Open the Smart Object by double clicking on its icon in the layers panel (**Yellow Color**)
- Make the desired changes within the Smart Object, such as adding a new image or text.
- Save the changes and close the Smart Object window to see the results in the main document

Double click the smart object layer then paste your design and save

Double click to change the background color and change the color of the material
